For more than 20 years, T rex has developed, defined and perfected timber-alternative decking. Our high-performance composite decks combine fade-resistant beauty with outstanding durability. Whether you’re planning a breakfast nook in your backyard or rooftop retreat, T rex makes it simple to create the kind of outdoors your life demands.

WHY TREX
Learn what makes T rex® unlike any other decking material.

Why Trex?

We know a deck is never just a deck. It’s an extension of your home, your own personal escape back to nature. With Trex, you can spend less time repairing your deck and more time enjoying it. See how our innovative shell technology makes Trex well worth the investment.

THE SECRET IS IN THE SHELL

Only Trex decks are wrapped in a high-performance shell that resists fading, staining, rot and splitting better than anything else out there, ensuring your Trex patio will perfectly complement your garden for years to come.

SEE HOW TREX STACKS UP against other decking materials.

| TREX HIGH-PERFORMANCE COMPOSITE | $$$  
|---------------------------------|------
| **DURABILITY**                 | resists mould, fade, stain and scratches; won’t warp, rot or splinter |
| **ENVIRONMENTAL RESPONSIBILITY** | made of 95% recycled materials |
| **EASE OF MAINTENANCE**         | cleans with soap and water |

| HOLLOW COMPOSITE | $  
|-------------------|------
| **DURABILITY**    | can fade, stain, scratch and mould |
| **ENVIRONMENTAL RESPONSIBILITY** | made of recycled materials |
| **EASE OF MAINTENANCE** | cleans with soap and water, may require bleach |

| PVC | $  
|-----|------
| **DURABILITY** | scratch and mould resistant; won’t warp, rot or splinter |
| **ENVIRONMENTAL RESPONSIBILITY** | made of virgin plastic |
| **EASE OF MAINTENANCE** | cleans with soap and water |

| TIMBER | $  
|--------|------
| **DURABILITY** | rots, splits, swells, twists and fades |
| **ENVIRONMENTAL RESPONSIBILITY** | contributes to deforestation |
| **EASE OF MAINTENANCE** | requires annual painting, oiling or staining |
MAKE THE MOST OF YOUR OUTDOOR SPACE

WHETHER YOU’RE BUILDING A SUNNY SPOT OUT BACK, A COOL AND BREEZY BALCONY OR EVEN A ROOF-TOP RETREAT, TREX HAS YOU COVERED.

RICH TEXTURED FINISH
HIDDEN FASTENERS HELP KEEP THE RICH TEXTURE OF TREX COMPLETELY PRISTINE AND UNBLEMISHED BY DECK SCREWS. LEARN MORE ON PAGE 11.

QUICK CLEANING
FORGET SANDING AND STAINING. WITH JUST SOAP AND WATER, YOU CAN KEEP YOUR TREX DECK TOTALLY CLEAN.

BOUNDLESS DESIGN POSSIBILITIES
IT’S EASY TO CREATE A CUSTOM LOOK WITH TREX. SEE HOW WITH OUR SPECIAL PATTERN GUIDE ON PAGE 14.

ENDURING BEAUTY
THANKS TO ITS FADE-RESISTANT SHELL, TREX LOOKS LIKE NEW FOR 25 YEARS.

HOW WE MAKE GREEN GREENER
From innovative materials to our eco-friendly processes, we take great pride in delivering sustainable products with minimal footprint.

» All Trex deck boards are made of 95% recycled materials
» Trex saves over 180 million kilos of plastic and timber scrap from landfills every year
» Trex hasn’t felled a single tree in all our years in the decking business

EASY INSTALLATION
TREX INSTALLS AS EASILY AS TIMBER—NO SPECIAL TOOLS NEEDED. GET STEP-BY-STEP INSTRUCTIONS ON PAGE 12.
Time to Design

Trex decking comes in a variety of lasting colours with deep grain patterns that complement any style home. So fall in love with one wisely. Because the colour you choose is the fade- and stain-resistant colour you’ll enjoy for decades.

LIKE WHAT YOU DON’T SEE?

Our grooved boards accommodate our revolutionary Trex Hideaway Hidden Fastening System, which allows for a smooth, unlettered finish—no screws, no screw holes, nothing to interrupt the smooth texture and comfortable feel of your new Trex deck.

IN-STOCK COLOURS

- Transcend Spiced Rum & Vintage Lantern
- Transcend Lava Rock
- Transcend Gravel Path
- Transcend Island Mist
- Transcend Tiki Torch
- Transcend Spiced Rum
INSTALLATION

Before installing any Trex product, you should review local building codes and regulations, and consult with local building officials, to ensure compliance and safety.

GLOSSARY OF TERMS

- **Carriage Bolt**: A bolt with a rounded head and a square shoulder under the head to prevent turning during installation.
- **Connector Clip**: Hidden fastener used between deck boards to secure positioning.
- **Joist**: A horizontal structural pressure-treated board that runs from wall-to-wall, wall-to-beam, or beam-to-beam to support the deck floor and decking materials.
- **Lag Bolt**: A large metal fastener with a hex head and screw threads that drive it into the wood.
- **Ledger Board**: A beam supporting one end of the joists.
- **Nosing**: The rounded front edge of a stair tread.
- **Pan-head Screw**: Self-tapping screw with W-cut design and slightly rounded head.
- **Riser**: The vertical board nailed to a stringer.
- **Rim Joist**: A joint used to join two pieces of decking end-to-end, usually cut at a 45° angle.
- **Self-tapping Screw**: A fastener that taps and drills its own hole and does not require a pre-drilled hole.
- **Start Clip**: A structural member in a stairway that supports the treads and risers.
- **Stair Tread**: The required width-to-width gapping is 6 mm.
- **Stringer**: The structural member in a stairway that supports the treads and risers.
- **Universal Fastener**: Plastic 6 mm self-gapping hidden fastener that has increased durability and allows for easier and faster installation than traditional fasteners.
- **Pan-head Screw**: Self-tapping screw with W-cut design and slightly rounded head.

SAFETY

- Most colored chalk lines are permanent. Use baby powder.
- When drilling large or deep holes, periodically lift the bit out of the hole to remove the shavings.
- If you want to minimize the appearance of joists through the spaces between boards, paint the top of your joists black.
- Trex® decking is heavier and more flexible than wood. DO NOT try to lift the same quantity of Trex boards as you would traditional lumber. Go to trex.com for Safety Data Sheets (SDS).
- Construction methods are always improving. Please make sure you have the most up-to-date installation instructions by visiting trex.com.

TOOLS

- You can create intricate shapes, profiles, and patterns with Trex. Most installations require no special tools. For best results, use carbide-tipped blades and router bits.

HOW WE MAKE GREEN GREENER DURING PRODUCTION

We use reclaimed wood from woodworking operations, used pallets and sawdust.

DECKING FASTENERS

For best results, we recommend Trex Hideaway® Hidden Fasteners, which work well and provide an attractive appearance.

If any condition occurs which is attributable to the use of non-recommended fasteners, such condition shall not be covered under Trex’s Limited Warranty.

GAPPING

You must gap Trex® decking, both end-to-end and width-to-width. Gapping is necessary for drainage and the slight thermal expansion and contraction of Trex decking boards. Gapping also allows for the shrinkage of the wood joist system.

- Note: Trex fascia has to be gapped width-to-width and end-to-end the same as Trex decking. See charts below.
- ALWAYS follow Trex-recommended gapping guidelines.
- All decks require air circulation to keep them dry and looking good. To improve air flow, leave openings under the decking or increase gapping to 10 mm.
- Maximum allowable perpendicular overhang for all Trex decking is 13 mm.

**WIDTH-TO-WIDTH GAP**

<table>
<thead>
<tr>

</tr>
<tr>
<td>406 mm</td>
<td>200 400 600 800 1000</td>
</tr>
</tbody>
</table>

NOTE: When using hidden fasteners (both start and connector clips), one must be used on every joist.

Calculating the Number of Connector Clips Needed

- No. of joists x No. of decking boards = No. of connector clips needed.
- Ninety connector clips will cover approximately 4.6 m² using 140 mm decking boards on 406 mm centers.

End-to-End/End-to-Width

Gao Trex decking end-to-end, based upon the temperature at installation. See chart at left.

Abutting Solid Objects

When decking is abutting a wall, you must also gap it 6—13 mm depending on the temperature at installation. See chart at left.
TIPS FOR INSTALLING A TREX HIDEAWAY® HIDDEN FASTENING SYSTEM

Installing Angled Deck Boards in Corners

ALWAYS start in corner with a small triangular piece of decking at 45° and work outwards. Install TREX Hideaway fasteners 13 mm off center to keep fastener screws in middle of joists.

How to Butt Seams

1. Install 254 mm–305 mm framing boards along joists where seams will butt.
2. Place additional fasteners on the adjacent board over the joist and framing boards where the seam will be.
3. Put the first board of the seam in place and secure with fastener.
4. Butt end of second board to first and secure with fastener.
5. Place second set of fasteners on each side of butt seam for next board.

FASCIA INSTALLATION RECOMMENDATIONS

Use three TREX recommended composite decking screws every 30.5 cm (12") (always refer to manufacturer instructions to ensure that recommended screws can be used for fascia applications). The top screw should be placed 2.5 cm (1") from the top of the rim joist, the second screw in the center of the rim joist, and the third screw 2.5 cm (1") from the bottom of the rim joist.

IN ADDITION, also use a weather resistant, construction grade adhesive (adhesives that work with wood will work with TREX products) as a SECONDARY fastener when attaching fascia. Remember to wipe away any excess before drying or allowing to drip on other TREX surfaces.

TIPS FOR INSTALLING A TREX HIDEAWAY® HIDDEN FASTENING SYSTEM

Installing Second Board

5. Slide second board into place, making sure fasteners fit into groove. Install the next universal fastener on the other side of the second board in the same manner as Steps 3 and 4. DO NOT fully tighten the screw.

Complete Installation

6. Tighten screws on fasteners in first row. Proceed with Steps 3 through 5, tightening down each row after board that follows is in place. Be sure to use a long No. 1 square bit.

HOW TO REPLACE TREX® BOARDS INSTALLED WITH UNIVERSAL FASTENERS

1. Remove screws from fasteners on both sides of board to be replaced and remove board.
2. Angle new board to place. See inset box (above).
3. Slide a fastener for each joist into board grooves from both ends of the board.

NOTE: You may have to loosen adjacent boards to slide fasteners into position.

4. Position replacement board and secure fasteners on center of each joist.

NOTE: Maximum spacing of deck boards using Hideaway system is 406 mm on center. Fasteners provide 6 mm gap when installed correctly.

Part 1

Install Universal Fasteners

3. Insert fastener into grooved edge of deck board.
4. Align screw hole in fastener with center of joist. Continue along the length of the board at every joist.

NOTE: Screw only half way down. DO NOT fully tighten.

Part 2

Installing Start Clips and First Board

1. Install start clips on edge of ledger board, centered on each joist. Secure clips with screws.
2. Push grooved edge of deck board into start clips.

Important: First board MUST be straight and well secured.

Part 3

Installing Third Board

5. Slide second board into place, making sure fasteners fit into groove. Install the next universal fastener on the other side of the second board in the same manner as Steps 3 and 4. DO NOT fully tighten the screw.

Complete Installation

6. Tighten screws on fasteners in first row. Proceed with Steps 3 through 5, tightening down each row after board that follows is in place. Be sure to use a long No. 1 square bit.

Part 4

Installing Start Clips and First Board

1. Install start clips on edge of ledger board, centered on each joist. Secure clips with screws.
2. Push grooved edge of deck board into start clips.

Part 5

Install Universal Fasteners

3. Insert fastener into grooved edge of deck board.
4. Align screw hole in fastener with center of joist. Continue along the length of the board at every joist.

NOTE: Screw only half way down. DO NOT fully tighten.
CODE COMPLIANCE

Joist Spanning for Decking
The joists must be spaced on center according to the chart below. Be sure that joists are level and plumb. Trex® decking must span at least three joists. For heavy items such as hot tubs, planters, etc., consult a local building engineer or inspector for span recommendations. If you want to minimize the appearance of joists through the spaces between boards, paint the top of your joists black.

NOTE: The ends of deck boards can not overhang joist by more than 10 mm.

For a Safety Data Sheet (SDS), please visit trex.com

HOE WE MAKE GREEN GREENER & STAY THAT WAY
We regularly seek out third-party audits to make sure we’re continuously improving our green practices while meeting all environmental, health and safety guidelines and regulations.

SPECIAL PATTERNS
When planning a unique pattern, you will need to adjust the framing to support the surface pattern. Many decks are designed to take advantage of angles, as shown below.

Herringbone Pattern
Tile Pattern
Picture Frame Pattern

TREX RECOMMENDATIONS WHEN USING WITH A BEARER SYSTEM:
A bearer system is a substructure between a solid surface and Trex decking. Drainage, access, and airflow are critical. Water must be able to flow through and away from the deck. For repairs and removal of debris, bearer system access may be necessary.

It is recommended that building code approved structural material be used as the supports.

End to End gapping rules are required when installing Trex Decking. See chart on page 12.

This system should not be allowed to float; it must be attached in a manner that secures the framing/system.

The bearer system must be level and have no uneven undulations. Any uneven areas of the substructure will transfer to the Trex decking, resulting in uneven decking.

Trex, when used with a bearer system, must be supported below its entire length and if using in a roofing application, the supports must run the direction of the pitch of the roof to facilitate proper drainage. Bearer should be placed perpendicular to the deck board orientation.

For Commercial applications it is recommended to consult local building code official for specific requirements.

If installing decking at angle, decrease spans 100 mm (4") for each of the above. (305 mm/12" for residential and 204 mm/8" for commercial).

For bearer systems where little debris (leaves, sand, dirt) can accumulate either between or under deck boards, a minimum of 38 mm (1.5") height is allowable and Trex Universal Hidden Fasteners can be used. (Note that Trex recommended composite decking screws are too long when using 38 mm (1.5") height as this will penetrate through the bearer.) For areas with the potential for debris buildup, a minimum 89 mm (3.5") or greater height is recommended to allow the debris to be removed along with the use of either Trex Universal Hidden fasteners or Trex recommended screws.

Always consult your local building code authority for proper details on roof and railing installation to the roof structure if required.

Any deviation from these recommendations could result in the voiding of the Trex warranty.

> For Commercial applications it is recommended to consult local building code official for specific requirements.
> If installing decking at angle, decrease spans 100 mm (4") for each of the above. (305 mm/12" for residential and 204 mm/8" for commercial).

For bearer systems where little debris (leaves, sand, dirt) can accumulate either between or under deck boards, a minimum of 38 mm (1.5") height is allowable and Trex Universal Hidden Fasteners can be used. Always consult your local building code authority for proper details on roof and railing installation to the roof structure if required.

Any deviation from these recommendations could result in the voiding of the Trex warranty.
STAIRS

Stairway Detail
» Fasten stair treads continuously across at least four stringers.
» See chart (at right) for center-to-center spacing of profiles.
» Dress the sides of the stringers and risers with Trex® fascia or trim for a finished look.
» Gapping between Trex boards on stair treads must be 6 mm–10 mm.
» The overhang of the stair tread is not to exceed 13 mm.

MAXIMUM SPACING OF STAIR JOISTS
(Center to Center)
| 24 mm x 140 mm Boards | 305 mm |

HOW TO INSTALL STAIR TREADS

Installation Options
Option 1: Using Hidden Fasteners
1. Install start clips against riser on each step.
2. Install first fastener.
3. Install second fastener.
4. Secure with screws from top of second board into stringer boards.

Option 2: Using 51 mm x 102 mm Wood Support Blocks
1. Install start clips against riser on each stair tread.
2. Install first board.
3. Attach 51 mm x 102 mm long wood support blocks between stringers.
4. Pre-drill holes up through blocks.
5. Install second board.
6. Secure with screws from bottom through blocks and into stair treads.

HOW TO INSTALL TREX TRANSCEND® COCKTAIL RAILING

Trex railing is suitable for residential decks with a deck board height up to 600 mm from the ground. For higher level decks or commercial decks please contact your local Trex supplier or retailer for advice.

Option 1:
1. Installing Pressure-Treated Posts
   See instructions on page 18.

Option 2:
1. Installing Post Sleeve Skirts and Post Sleeves
   See instructions on page 18.
2. Installing Railing Support Brackets (RSBs)
   See instructions on page 18.
3. Cutting Railing, Attaching Bottom Rail (Universal Rail), Adding Weep Holes, and Foot Block
   See instructions on page 18.
4. Cutting Railing, Attaching Bottom Rail (Universal Rail), Adding Weep Holes, and Foot Block
   See instructions on page 19.
5-6. Placing Baluster Spacers and Balusters
   See instructions on page 19.

Attaching the Inverted Universal Rail as Top Rail
7. Place inverted universal rail onto RSBs with balusters in channel. Attach universal rail to RSBs with two self-tapping screws (provided).
8. Place deck boards over universal rails. Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end). Secure boards to universal rails from underside of railing into bottom of decking board with 51 mm pan-head screws (not provided) every 406 mm on center.
9. Slide baluster spacers up and snap into universal rails.

NOTE: If necessary, cut tips off rail gaskets prior to installation.

10. Use scarf cut for posts where two deck boards meet.

NOTE: If installing in weather below 4.5°C, leave 3 mm gap between deck boards.

NOTE: Deck boards can overhang end of last post maximum 13 mm.
HOW TO INSTALL TREX TRANSCEND® STANDARD RAILING

Trex railing is suitable for residential decks with a deck board height up to 600 mm from the ground. For higher level decks or commercial decks please contact Arbor Forest Products Ltd for advice.

Read all instructions BEFORE installation.

Important: Post sleeves are NOT to be cut for this design style.

Installing Pressure-Treated Posts

» Posts are to be installed 1.83 m or 2.44 m on center to accommodate appropriate railing length.

» Attach posts using 13 mm carriage bolts.

» Minimum joist size is 51 mm x 203 mm.

» Top bolts must be 25 mm from tops of joists.

» Bottom bolts must be 130 mm from top bolts.

NOTE: Blocking can be added for extra strength.

Installing Post Sleeve Skirts and Post Sleeves

2. Slide post sleeve skirt over post and down to rest on decking surface. Slide post sleeve over post and position inside post sleeve skirt.

NOTE: Shims can be used to plumb post sleeves.

Installing Railing Support Brackets (RSBs)

Option 1: Without TrexExpress™ Railing Template

3a. Mark 140 mm and 891 mm from deck surface OR for 1067 mm height, mark 140 mm and 1043 mm from the deck surface.

3b. Place RSBs directly under marks, center on posts, and secure with 51 mm wood screws (provided with railing kit). Place top RSBs flat side up, bottom RSBs flat side down.

Option 2: With TrexExpress Railing Template

3c. Place RSBs in template. Place top RSBs flat side up, bottom RSBs flat side down. Secure template on post with tape or rubber band, with bottom of template resting on post skirt.

3d. Secure RSBs with 51 mm wood screws (provided with railing kit) and remove template.

NOTE: Special steps are necessary when using 152 mm x 152 mm plastic TrexExpress template.

» Cut off 13 mm from the bottom (blue arrows up) of the tool before first use.

» Position top RSBs only, 152 mm higher for 1067 mm rail height.

» Secure RSBs with 64 mm wood screws (provided in railing kit) and remove template.

4a. Measure between posts and cut rails to same length.

NOTES:
» If using optional rail gaskets, subtract 1.5 mm from each end.

» When measuring, cut equal lengths from each end of railing and baluster spacer to ensure equal spacing of balusters per each railing section.

» Attach baluster spacer to railing before cutting to allow for cleaner cut and less work.

» In some cases, the gasket can be attached before tightening railing to RSB.

4b. Center foot block in universal rail channel and attach. DO NOT extend foot block. Attach foot block to bottom rail per instructions that are included with the foot block.

4c. Lift bottom rail so RSBs are in the channel and attach with self-tapping screws (provided).

4d. Telescope foot block down and screw through opposite sides. Place screw plugs.

4e. Center and drill 8 mm weep holes through bottom rail channel to allow for water drainage. Holes should be placed between first two balusters on each side and approx. 630 mm spans along length of rail.

Placing Baluster Spacers and Balusters

5. Cut baluster spacers the same length as rails, equally spaced so the holes line up.

6. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer. Place balusters in baluster spacer holes.

Attaching Top Rail – Crown Rail

7. Place top rail on RSBs with balusters in rail channels. Attach top rail to RSB with two self-tapping screws (provided).

8. Slide baluster spacer up and snap into top rail. Place optional top rail gaskets on each end of rail.

Attaching Post Caps

9. Secure post caps with silicone or PVC adhesive.

NOTE: Clean-up any excess adhesive before drying.

### TREX TRANSCEND® CARE AND CLEANING GUIDE

All exterior building materials require cleaning. Generally, soap and water is all that is required to clean Transcend products. For further information, see below.

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Dirt and Debris</strong></td>
<td>The affected areas should be sprayed off with a hose to remove surface debris. Use warm soapy water and a soft brush to remove dirt and dust from the embossing pattern.</td>
</tr>
<tr>
<td><strong>Hard Water Staining</strong></td>
<td>Hard water is water with a high amount of mineral deposits like lime, silica and calcium. When the water drains, deposits are left behind, leaving unsightly spots on surfaces. This is not a defect of Trex products but an issue with the water itself. Generally these deposits can be cleaned with white vinegar on decking surfaces or use Magic Eraser® erosioning surfaces. Rinsing is required so care should be taken to not use hard water for this purpose, and if it must be used, dry with a cloth or use a blower to dry surface.</td>
</tr>
</tbody>
</table>
| **Chalk Lines** | **WARNING:** Mr. Clean® and Magic Eraser® are registered trademarks of The Procter and Gamble Company. ***Use of a pressure washer greater than 3100 psi*** that has a fan attachment/adjustment and soap dispenser may be used to remove dirt, concrete dust, or other types of construction dirt. Spray deck with soap, then follow with gently scrubbing each deck board with a soft bristle brush. Rinse each individual deck board using a fan tip no closer than 8-in from the deck surface. **Never use acetone or other solvents on Trex Transcend or Select railing to maintain the beauty of the product.***

### HOW WE MAKE GREEN GREENER IN OUR FACTORIES

- _Factory runoff is recycled back into the manufacturing line._
- _The processing methods at Trex eliminate any need for smokestacks._

TREX® LIMITED WARRANTY

Trex Company, Inc. (hereafter “Trex”) warrants to the original purchaser (“Purchaser”) that, for the period of time set forth in the following sentence, under normal use and subject to the conditions set forth below, Trex® products shall be free from material defects in workmanship and materials, and shall not split, splinter, rot or suffer structural damage from termites or fungal decay. The term of such warranty shall be twenty-five (25) years from the date of original purchase for a residential application, and ten (10) years from the date of original purchase for a commercial application. If a defect occurs within the warranty period, Purchaser shall notify Trex in writing and, upon confirmation by an authorized Trex representative of the defect, the Trex® sole responsibility shall be, at its option, to either replace the defective item or refund the portion of the purchase price paid by Purchaser for such defective item (not to exceed the cost of its initial installation). Replacement material will be provided that is as close as possible in color, design and quality as the original material, but Trex does not guarantee an exact match or color and design may change.

Notwithstanding the foregoing, (a) the term of the warranty for the LED lights and housing for Trex® DeckLighting™ shall be seven (7) years, the term of the warranty for the LED lights and housing for Trex® LandscapeLighting™ shall be five (5) years, and the term of the warranty for the dimmer, timer and transformer for both shall be three (3) years, in each case provided that a Trex transformer is used (with no warranty on any components if a Trex transformer is not used), and any other parts or accessories shall not be warranted; (b) with respect to hardware for the Trex Surroundings® gate (gate frame, hinges and screws), the term shall be two (2) years; (c) with respect to Trex Decorative Balusters, the term of the warranty covering the paint coating shall be ten (10) years, and shall be prorated in the following manner: 100% replacement for the first five (5) years; and 50% replacement for the next five (5) years, and (d) this warranty shall not apply to Trex Elevations® steel deck framing, Trex Reveal® aluminum railing and TrexTim® (which each have separate warranties).

For purposes of this warranty, a “residential application” shall refer to an installation of the Product on an individual residence, and a “commercial application” shall refer to any installation of the Product other than on an individual residence. With respect to a residential application, this warranty may be transferred one (1) time, within the five (5) year period beginning from the date of original purchase to a subsequent owner of the property upon which the Trex products were originally installed. With respect to a commercial application, this warranty is freely transferable to subsequent buyers of the property upon which the Trex products were originally installed.

To make a claim under this limited warranty, Purchaser, or the transferee, shall send to Trex, within the warranty period referred to above, a description of the claimed defect and proof of purchase, to the following address:

Trex Company, Inc.
Customer Relations
160 Ester Drive
Winchester, VA 22603-8605
U.S.A.

Trex does not warrant against and is not responsible for, and no implied warranty shall be deemed to cover, any condition attributable to: (1) improper installation of Trex products and/or failure to abide by Trex’s installation guidelines, including but not limited to improper gapping; (2) use of Trex products beyond normal use and service conditions, or in an application not recommended by Trex’s guidelines and local building codes; (3) movement, distortion or settling or the ground or the supporting structure on which Trex products are installed; (4) any act of God (such as flooding, hurricane, earthquake, lightning, etc.), environmental condition (such as air pollution, mold, mildew, etc.), staining from foreign substances (such as dirt, grease, oil, etc.), or normal weathering (defined as exposure to sunlight, weather and atmospheric change that will cause any colored surfaceto gradually fade, chalk, or accumulate dirt or stains); (5) variations in color; (6) any fading or discoloration caused by handling, storage, abuse or neglect of Trex products by Purchaser, the transferee or third parties; and/or (7) ordinary wear and tear.

No person or entity is authorized by Trex to make and Trex shall not be bound by any statement or representation as to the quality or performance of Trex products other than as contained in this warranty. This warranty may not be altered or amended except in a written instrument signed by Trex and Purchaser.

UNDER NO CIRCUMSTANCES WILL TREX BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES, WHETHER SUCH DAMAGES ARE SOUGHT IN CONTRACT, IN TORT (INCLUDING BUT NOT LIMITED TO NEGLIGENCE AND STRICT LIABILITY) OR OTHERWISE, AND TREX’S LIABILITY WITH RESPECT TO DESTRUCTIVE PRODUCTS SHALL IN NO EVENT EXCEED THE REPLACEMENT OF SUCH PRODUCTS OR REFUND OF THE PURCHASE PRICE, AS DESCRIBED ABOVE.

Some nations do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may have other rights which vary from nation to nation. Consumers have legal rights under applicable national legislation governing the sale of consumer goods. This warranty does not affect those rights.

For the term set forth below, Trex Company, Inc. (hereafter “Trex”) warrants to the original purchaser (the “Purchaser”) that the Trex® Transcend® and Trex® Fascia Limited Warranty applies to all Trex products. Purchaser must be the original purchaser of the Product other than on an individual residence, and a “commercial application” shall refer to an installation of the Product on an individual residence, and a “commercial application” shall refer to an installation of the Product on an individual residence.

Term of Warranty: The term of this warranty shall be twenty-five (25) years from the date of original purchase. The term of the warranty for the LED lights and housing for Trex® DeckLighting™ shall be seven (7) years, the term of the warranty for the LED lights and housing for Trex® LandscapeLighting™ shall be five (5) years, and the term of the warranty for the LED lights and housing for Trex® Transcend™ and Trex® Fascia limited warranty shall be five (5) years.

Exclusions from Warranty Coverage:

Expanding/Contracting: Due to the nature of materials, the use of Trex® products will result in some expansion and contraction. In such cases, the Purchaser agrees to the above stated warranty and terms.

Surface Damage: Will not cover drilling holes or sharp edged tools to remove snow and ice in the surface of the Product. Any damages caused by such exposure shall be removed.

Direct or Indirect Results from Light Sources: This warranty does not cover damage from sunlight or light exposure. Such causes include, but not limited to, biocides, fungicides, plant food, or bactericides. Mold and mildew can settle and grow on any outdoor surface, including this Product. This warranty does not cover mold and mildew which is not properly cleaned as provided above within one (1) week of first appearance.

Stain Resistance:

(a) Purchaser must try to clean the affected area of the deck by using the claim procedures described above within one (1) week of exposure of the food or beverage to the Product or first appearance of the mold and mildew.

(b) If the affected area remains reasonably unsatisfactory after Purchaser has tried these cleaning procedures, then Purchaser must have the affected area of the deck professionally cleaned at Purchaser’s expense.

(c) If the affected area remains unsatisfactory after the professional cleaning, Purchaser may make a claim under this warranty provided that such claim is made within thirty (30) days after the professional cleaning.

2. To make a claim under this limited warranty, Purchaser, or the transferee, shall send to Trex, within the warranty period referred to above, a description of the claimed defect and proof of purchase, and if the claim relates to the installation of replacement materials, provide documentation with paragraph 1 above, to the following address:

Trex Company, Inc.
Customer Relations
160 Ester Drive
Winchester, VA 22603-8605
U.S.A.

5. THIS WARRANTY SHALL NOT COVER AND TREX SHALL NOT BE RESPONSIBLE FOR COSTS AND EXPENSES INCURRED WITH RESPECT TO THE REMOVAL OF DEFECTIVE TREX PRODUCTS OR THE INSTALLATION OF REPLACEMENT MATERIALS, INCLUDING BUT NOT LIMITED TO LABOR AND FREIGHT.

Under no circumstances will Trex be liable for special, incidental or consequential damages, whether such damages are sought in contract, in tort (including but not limited to negligence and strict liability) or otherwise, and Trex’s liability with respect to products shall in no event exceed the replacement of such products or refund of the purchase price, as described above.

Some nations do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may have other rights which vary from nation to nation. Consumers have legal rights under applicable national legislation governing the sale of consumer goods. This warranty does not affect those rights.
