RAILING
RAILING—
a lot easier than it looks

Selecting the right railing is pretty easy, but each Trex railing line is a little different. Please read the system descriptions at the top of each product section so you can choose exactly which railing components you need to complete your design. For additional guidance, the chart to the left depicts each railing system’s components.

Trex Post Sleeves, Caps & Skirts

These components can be used as Steps 1 & 2 for all Trex railing lines.

Aluminum railing has a textured finish.
TREX TRANSCEND RAILING

NOTES:

» TREX TRANSCEND RAILINGS ARE DESIGNED TO BE INSTALLED OVER THE DECKING FRAME OR ON INSIDE OF RIM JOIST. NOTCHING OF PRESSURE-TREATED POSTS OR POSTS INSTALLED ON OUTSIDE OF RIM JOIST IS NOT ALLOWED.

» All Trex Transcend railing lengths are manufactured at ON CENTER dimensions (spanning from center of each post): 67-5/8” (1718 mm) for 6’ (1.83 m) on center, and 91-5/8” (2353 mm) for 8’ (2.44 m) on center. Note that railings are designed to be slightly longer that required to allow for very slight play in post placement – some minimal trimming may be required. IT IS VERY IMPORTANT TO MEASURE FIRST.

PARTS

A. Crown or Universal
B. Universal
C. Trex railing support bracket (RSB)
D. TrexExpress™ Railing Assembly Template*
E. Rail gaskets
F. Balusters
G. Post sleeve cap*
H. Post sleeve skirt*
I. Post sleeve – 4” x 4” (102 mm x 102 mm) or 6” x 6” (152 mm x 152 mm) post sleeve)**
J. Trex decking
K. Trex fascia
L. Code-approved wood joist – 2” x 8” (51 mm x 203 mm)
M. Code-approved wood rim joist – 2” x 8” (51 mm x 203 mm) or larger
N. Adjustable foot block (quantity of one is required for all railing span lengths)
O. Baluster spacer

Trex Transcend Glass Panel Parts List
P. Panel support molding
Q. Tempered glass panel*
R. Trex panel support molding spacer
S. Weatherstripping

* Item not included in the Transcend railing kits.
** Both 4” x 4” (102 mm x 102 mm) and 6” x 6” (152 mm x 152 mm) post sleeves are designed to fit over 4x4 pressure-treated post

NOT: Pictorial representations shown may only show one style of railing, while others may also be used. Review detailed instructions to determine what railing styles and combinations can be used.

DETERMINING BALUSTERS NEEDED

<td>15</td>
<td>20</td>
</tr>
<tr>
<td>Round/Square Aluminum (Stair Application)</td>
<td>12</td>
<td>16</td>
</tr>
</tbody>
</table>

NOTE: Basic installation for balusters is the same for all options. When using round or square aluminum balusters, use correct baluster spacers.

NOTE: If installing 42” (1067 mm) railing, use longer posts sleeves and measure accordingly to ensure a proper cut. DO NOT CUT TO ACTUAL 42” LENGTH WITHOUT CONFIRMING WHAT STYLE OF RAILING YOU ARE INSTALLING.

NOTE: If using post mounts, refer to detailed instructions provided with post mounts for attaching these prior to installation of any railing type.

Screws Supplied with RSB
C1. Wood screw for attachment of RSB to wood post/composite sleeve
C2. Self-tapping rail screw for attachment of railing to RSB
**TREX TRANSCEND RAILING CONFIGURATIONS**

*Note: See specific installation instructions for attachment of Trex post mounts or Trex Joist Mount Posts prior to installing any railing.*

### Standard Crown

- Cutting post sleeves is **NOT** required.
  - A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve*, or Joist Mount Post/Trex post sleeve* (INSIDE MOUNT ONLY)
  - B. Crown rail
  - C. Universal bottom
  - D. Trex balusters
  
  See page 61 for “How to Install Standard Railing”.

### Cocktail

- Post sleeves will need to be cut.
  - A. Pressure-treated post with Trex Transcend post sleeve
    - **NOTE:** » Only for use with 4” x 4” (102 mm x 102 mm) post sleeve.
      » Trex post mounts cannot be used with Transcend cocktail design.
  - B. Deck board top rail (1 x 6 or 2 x 6). **NOTE:** Contour and Escapes cannot be used.
  - C. Universal top rail
  - D. Universal bottom
  - E. Trex balusters
  
  See page 63 for “How to Install Cocktail Railing”.

  **NOTE:** Additional pan head screws will need to be purchased - see detailed instructions.

### Traditional

- Cutting post sleeves is **NOT** required.
  - A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve*, or Joist mount post/Trex post sleeve* (INSIDE MOUNT ONLY)
  - B. 2” x 4” (51 mm x 102 mm) lateral top rail
  - C. Universal top rail
  - D. Universal bottom
  - E. Trex balusters
  
  See page 64 for “How to Install Traditional Railing”.

  **NOTE:** Additional pan head screws will need to be purchased - see detailed instructions.

### Round Aluminum

- Follow desired railing style instructions found above, substituting correct baluster spacer for type of baluster being used.
- Refer to detailed instructions for added steps when using round and square aluminum balusters. See page 65.

### Square Aluminum

### Glass Panel

- Cutting post sleeves is **NOT** required.
  - A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve**, or Joist mount post/Trex post sleeve** (INSIDE MOUNT ONLY)
  - B. Crown rail (use universal rail if building cocktail or traditional design with glass inserts)
  - C. Universal bottom
  - D. Tempered glass panel (**NOT** included in kit)
  
  See page 66 for “How to Install Standard Glass Panel Railing”, page 66 for “How to Install Cocktail Style Glass Panel Railing” (**NOTE:** Trex Post Mounts or Trex Joist Mount Posts cannot be used with this railing configuration), and page 69 for “How to Install Traditional Style Glass Panel Railing”.

  **NOTE:** Glass panels are not recommended in stair applications.
HOW TO INSTALL STANDARD RAILING
TREX TRANSCEND

Read all instructions BEFORE installation.
Important: Post sleeves are NOT to be cut for this design style.

Installing Pressure-Treated Posts

» Posts are to be installed 6’ (1.83 m) or 8’ (2.44 m) on center to accommodate appropriate railing length.
» Attach posts using 1/2” (130 mm) carriage bolts.
» Minimum joist size is 2” x 8” (51 mm x 203 mm).
» Top bolts must be 1” (25 mm) from tops of joists.
» Bottom bolts must be 5-1/8” (130 mm) from top bolts.
» Bolts can be countersunk flush with framing to allow for fascia attachment

NOTE: Blocking can be added for extra strength.

Installing Post Sleeve Skirts and Post Sleeves

2. Slide post sleeve skirt over post and down to rest on decking surface. Slide post sleeve over post and position inside post sleeve skirt.

NOTE: Shims can be used to plumb post sleeves.

Installing Railing Support Brackets (RSBs)

Option 1: Without Trex Express railing template

3a. Mark 5-1/2" (140 mm) and 35-1/16" (891 mm) from deck surface OR for 42" (1067 mm) height, mark 5-1/2" (140 mm) and 41-1/16" (1043 mm) from the deck surface.
3b. Place RSBs directly under marks, center on posts, and secure with 2" (51 mm) wood screws (provided with post sleeve). Place top RSBs flat side up, bottom RSBs flat side down.

Option 2: With TrexExpress railing template

3c. Place RSBs in template. Place top RSBs flat side UP, bottom RSBs flat side DOWN. Secure template on post with tape or rubber band, with bottom of template resting on post skirt.
3d. Secure RSBs with 2” (51 mm) wood screws (provided in railing kit) and remove template.

NOTES: Special steps are necessary when using 6” x 6” (152 mm x 152 mm) plastic TrexExpress template.
» Cut off 1/2” (13 mm) from the bottom (blue arrows up) of the tool BEFORE first use.
» Position top RSBs ONLY, 6” (152 mm) higher for 42” (1067 mm) rail height.
» Secure RSBs with 2-1/2” (64 mm) wood screws (provided with post sleeve) and remove template.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
Cutting Railings and Baluster Spacers

4. Measure between posts and cut rails to same length.
5. Cut baluster spacers the same length as rails, equally spaced, so holes line up.

NOTES:
» If using optional rail gaskets, subtract 1/16” (1.6 mm) from each end.
» Attach baluster spacers to railing before cutting to allow for cleaner cut and less work.
» When measuring, cut equal lengths from each side of railing and baluster spacer to ensure equal spacing of balusters per each railing section.
» In some cases, the gasket can be attached before tightening railing to RSB.
» If gaskets are tight, use a small flat head screwdriver to compress the tabs of the gasket if they are stuck outside the rail.

IMPORTANT NOTE REGARDING FOOT BLOCK INSTALLATION:
» One foot block is REQUIRED for all railing spans.
» Determine which style of foot block is included. Original foot block is a one-piece part that is adjustable. New foot block is a two-piece part with turning base mount.
» Also refer to detailed instructions (Trex Transcend® rail instructions) included with foot block prior to installation of railing section as these include other required steps for proper installation.

If Attaching Original Foot Block to Bottom Rail
6a. Center foot block in universal rail channel and attach per Original foot block instructions. DO NOT extend foot block.

If Attaching New Foot Block to Bottom Rail
6b. Invert the bottom rail. Center and drill a hole using a 3/16” drill bit. This will be location for foot block attachment (to be installed last).

Attaching Bottom Rail (Universal Rail)
7. Lift bottom rail so RSBs are in the channel and attach with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping holes (provided).

Attaching Top Rail – Crown Rail
8. Place crown rail on RSBs. Attach top rail to RSB with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

Placing Baluster Spacers
9. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer.

Attaching Balusters
10. Place baluster into both baluster spacers, ensuring that balusters are fully seated into the channel. Working at slight angle, maneuver balusters into top rail. See page 65 if using Aluminum round or square balusters for additional information.
HOW TO INSTALL STANDARD RAILING/CONTINUED
TREX TRANSCEND

11. Slide baluster spacer up and snap into top rail. Place optional top rail gaskets on each end of rail.

Attaching Post Caps and Installing New Foot Blocks
12. Secure post caps with silicone or PVC adhesive. Attach New foot block per foot block instructions.

NOTE: Clean up any excess adhesive before drying.

HOW TO INSTALL COCKTAIL RAILING
TREX TRANSCEND

Important: ONLY use with 4” x 4” (102 mm x 102 mm) post and post sleeve. Cutting post and post sleeve ONLY apply to the Transcend Cocktail railing.

1. Installing Pressure-Treated Posts
   See instructions on page 61.

Cutting Post and Post Sleeve
1a. Mark and cut post and post sleeve measuring from deck surface:
   » 36-3/16” (919 mm) for 36” (914 mm) height.
   » 42-3/16” (1072 mm) for 42” (1067 mm) height.

2. Installing Post Sleeve Skirts and Post Sleeves
   See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)
   instructions on page 61.

4. Cutting Railings and Baluster Spacers
   See instructions on page 62.

5. Attaching Foot Block
   See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)
   See instructions on page 62.

Attaching Inverted Universal Rail as Top Rail

7. Place inverted universal rail onto RSBs. Attach universal rail to RSBs with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

8. Place deck boards (DO NOT use Escapes deck boards for top rail) over universal rails. Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end). Secure boards to universal rails from underside of railing into bottom of decking board, with 2” (51 mm) pan-head screws (not provided) at an angle every 16” (406 mm) on center.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL COCKTAIL RAILING/CONTINUED
TREX TRANSCEND

IMPORTANT NOTES:
» If using Select decking, USE maximum length 1-3/4” (44 mm) screw and NOT 2” (51 mm) screw.
» Screws that are used for attaching decking board to railing MUST be attached at an angle to prevent screw from penetrating through the top of decking board.

9. Placing Baluster Spacers
See instructions on page 62.

10. Slide baluster spacers up and snap into universal rails.

NOTE: If necessary, cut tips off rail gaskets prior to installation.

11. Use scarf cut for posts where two deck boards meet.

NOTES:
» Leave 1/8” (3 mm) gap between deck boards.
» Deck boards can overhang end of last post maximum 1/2” (13 mm).

HOW TO INSTALL TRADITIONAL RAILING
TREX TRANSCEND

1. Installing Pressure-Treated Posts
See instructions on page 61.

2. Installing Post Sleeve Skirts and Post Sleeves
See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)
See instructions on page 61.

4. Cutting Railings and Baluster Spacers
See instructions on page 62.

5. Attaching Foot Block
See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)
See instructions on page 62.

Attaching Inverted Universal Rail as Top Rail
7. Place inverted universal rail onto RSBs. Attach universal rail with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping holes (provided).

8. Measure between posts and cut 2” x 4” (51 mm x 102 mm) to length. Place 2” x 4” (51 mm x 102 mm) on universal rail. Attach board to rail with 2” (51 mm) pan-head screws (not provided) every 16” (406 mm) on center.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TRADITIONAL RAILING/CONTINUED
TREX TRANSCEND

9. Pre-drill a pilot hole and toenail 2-1/2" (64 mm) composite decking screw (not provided) at each end of 2" x 4" (51 mm x 102 mm) into post on back side of rail (side not facing decking).

10. Placing Baluster Spacers
    See instructions on page 62.

11. Attaching Balusters
    See instructions below for standard baluster and instructions below for aluminum balusters.

12. Slide baluster spacer up and snap into universal rail.

NOTE: If necessary, cut tips off rail gaskets prior to installation.

13. Attaching Post Caps and Installing New Foot Block
    See instructions on page 63.

HOW TO INSTALL ROUND OR SQUARE ALUMINUM BALUSTERS
TREX TRANSCEND

1. Installing Pressure-Treated Posts
    See instructions on page 61.

2. Installing Post Sleeve Skirts and Post Sleeves
    See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)
    See instructions on page 62.

4. Cutting Railings and Baluster Spacers
    See instructions on page 62.

5. Attaching Foot Block
    See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)
    See instructions on page 62.

Installing Aluminum Baluster Adaptor Strip
7. After bottom rail is fully installed, place aluminum baluster adaptor strip into channel of bottom rail, ensuring that it’s fully seated into the channel. When rail lengths are non-standard, the baluster adaptor strip will need to be cut 2-1/2" (64 mm) shorter than the rail to allow clearance for the RSB’s on each end.

8. Attaching Top Rail
    See specific instructions based on top rail of choice.

Attaching Aluminum Baluster Adaptor Strips and Baluster Spacers
9. After top rail is fully installed, place aluminum baluster adaptor strip into channel of top rail, ensuring that it’s fully seated into the channel.
HOW TO INSTALL ROUND OR SQUARE ALUMINUM BALUSTERS/CONTINUED
TREX TRANSCEND

10. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer.

Attaching Balusters
11. Working at slight angle, press baluster through both baluster spacers and into bottom aluminum baluster adaptor strip, ensuring balusters are tight. Once balusters are seated into aluminum baluster adaptor strip on bottom rail, maneuver baluster into upper rail aluminum baluster adaptor strip. Some force will be needed to press balusters into place and level them.

Tip: Ensure balusters are level prior to attempting to slide baluster spacer up. This will allow for the baluster spacer to move up freely and snap into upper rail. Use of a rubber mallet to gently tap balusters in level is recommended.

12. Slide baluster spacer up and snap into top rail. Place optional top rail gaskets on each end of rail.

HOW TO INSTALL STANDARD GLASS PANEL RAILING
TREX TRANSCEND

NOTES: Read all instructions BEFORE installation.
» You must purchase the 1/4” (6 mm) tempered glass panels. See dimensions below.
» Glass panels ONLY for use with maximum 6’ (1.83 m) on center post spacing.
» Not recommended for stair applications.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL STANDARD GLASS PANEL RAILING/CONTINUED
TREX TRANSCEND

1. Installing Pressure-Treated Posts
   See instructions on page 61.

2. Installing Post Sleeve Skirts and Post Sleeves
   See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)
   See instructions on page 61.

4. Cutting Railings
   See instructions on page 62.

5. Attaching Foot Block
   See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)
   See instructions on page 62.

Attaching Weatherstripping and Positioning Panel

7. Push black-edged trim onto upper and lower edges of panel. Trim should be the exact length of the glass panel. Extra trim can be cut with razor blade or scissors.

8. Position panel with weatherstripping into lower rail channel. Center panel between posts with about 2” (51 mm) of air space on each side of panel.

Attaching Top (Crown) Rail

9. Place top rail over RSB brackets and glass panel. Attach top rail to RSB with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

NOTE: Avoid hitting glass panel while using the drill.

Attaching Panel Support Molding

Hiding Brackets

11. Cut Transcend baluster spacer into four lengths equal to distance between the glass panel and posts. Cut slowly and one at a time, to avoid chipping.

12. Snap spacer into bottom and top rail to hide brackets and create a seamless look.

13. Attaching Post Caps and Installing New Foot Blocks
   See instructions on page 63.

TEMPERED GLASS PANEL DIMENSIONS

» 36” (914 mm) high rail:
   1/4" x 30" x 63-1/2" max.
   (6 mm x 762 mm x 1613 mm)

» 42” (1067 mm) high rail:
   1/4" x 36" x 63-1/2" max.
   (6 mm x 914 mm x 1613 mm)
HOW TO INSTALL COCKTAIL STYLE GLASS PANEL RAILING
TREX TRANSCEND

NOTES: Read all instructions BEFORE installation.
» You must purchase the 1/4” (6 mm) tempered glass panels. See dimensions below.
» Glass panels ONLY for use with maximum 6' (1.83 m) on center post spacing.
» NOT recommended for stair applications.
» Trex post mounts cannot be used for this application.

1. Installing Pressure-Treated Posts
   See instructions on page 61.

   NOTE: If installing glass with cocktail rail design, rail posts and post sleeves must be cut.

1a. Cutting Post and Post Sleeve
   See instructions on page 61.

2. Installing Post Sleeve Skirts and Post Sleeves
   See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)
   See instructions on page 61.

4. Cutting Railings
   See instructions on page 62.

5. Attaching Foot Block
   See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)
   See instructions on page 63.

7-8. Attaching Weatherstripping and Positioning Panel
   See instructions on page 67.

Attaching Top Rail

9. Cut deck boards to appropriate length of railing span, remembering to include extra space on each side of the deck board to allow for attachment to the post. Decking boards must cover 1/2 of the pressure-treated post to allow this to be fastened later. If you include extra decking material on each side this can be cut off later if needed.

10. Place inverted deck board (place top side of deck board down) on clean, flat surface.
    (DO NOT use Escapes deck boards for top rail.)

11. Place Universal rail (orient this properly so when flipped over, the universal rail will accept the baluster spacer and balusters), on the deck board, centered in both directions to allow final attachment to post.
HOW TO ATTACH COCKTAIL STYLE GLASS PANEL RAILING/CONTINUED
TREX TRANSCEND

12. Secure deck board to Universal rail with 2” (51 mm) pan head screws (not provided) approximately every 16” (406 mm) on center at an angle. (DO NOT overtighten. Attach from underside of railing into bottom of decking board.)

**IMPORTANT NOTES:**
» If using Select decking, **USE** maximum length 1-3/4” (45 mm) screw and **NOT** 2” (51 mm) screw.
» Screws that are used for attachment of decking board to railing **MUST** be attached at angle to prevent screw from penetrating through top of decking board.

13. Place inverted Universal rail with deck board attached onto RSB’s with glass panel in the channel. Attach Universal rail to RSB’s with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (**provided**).

14. Attach deck board to post (ensure that screws are attached to wood post) with Trex recommended composite screws (quantity of 2 per each board end).

15. Attaching Panel Support Moldings
See instructions on page 67.

HOW TO ATTACH TRADITIONAL STYLE GLASS PANEL RAILING
TREX TRANSCEND

**NOTES: Read all instructions BEFORE installation.**
» You must purchase the 1/4” (6 mm) tempered glass panels. See dimensions below.
» Glass panels **Only** for use with maximum 6’ (1.83 m) on center post spacing.
» **NOT** recommended for stair applications.

**TEMPERED GLASS PANEL DIMENSIONS**

» **36” (914 mm) high rail:**
  1/4” x 30” x 63-1/2” max.
  (6 mm x 762 mm x 1613 mm)

» **42” (1067 mm) high rail:**
  1/4” x 36” x 63-1/2” max.
  (6 mm x 914 mm x 1613 mm)
1. Installing Pressure-Treated Posts  
   See instructions on page 61.

2. Installing Post Sleeve Skirts and Post Sleeves  
   See instructions on page 61.

3. Installing Railing Support Brackets (RSBs)  
   See instructions on page 61.

4. Cutting Railings  
   See instructions on page 62.

5. Attaching Foot Block  
   See instructions on page 62.

6. Attaching Bottom Rail (Universal Rail)  
   See instructions on page 62.

7-8. Attaching Weatherstripping and Positioning Panel  
   See instructions on page 67.

Attaching Top Rail

9. Cut 2” x 4” (51 mm x 102 mm) to same length of the inverted Universal rail.

10. Place inverted 2” x 4” (51 mm x 102 mm) (place top side down) on clean, flat surface.

11. Place Universal rail (remembering to orient this properly so that when flipped over, the Universal rail will accept the baluster spacer and balusters), on the 2” x 4” (51 mm x 102 mm), centered.

12. Secure 2” x 4” (51 mm x 102 mm) to Universal rail with 2” (51 mm) pan head screws (not provided) approximately every 16” (406 mm) on center.

13. Place inverted Universal rail with 2” x 4” (51 mm x 102 mm) attached onto RSB’s with glass panel in the channel. Attach Universal rail to RSB’s with three self-tapping screws provided. (Use three outer holes; do not use hole in RSB that is closest to post.) If two-hole bracket is included, attach with two self-tapping screws (provided).

14. Pre-drill a pilot hole and toenail 2-1/2” (64 mm) composite deck screw (not provided) at each end of the 2” x 4” (51 mm x 102 mm) into post on back side (side not facing decking).

15. Attaching Panel Support Moldings  
   See instructions on page 67.

16-17. Hiding Brackets  
   See instructions on page 67.

18. Attaching Post Caps and Installing New Foot Block  
   See instructions on page 67.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL ON-AN-ANGLE RAILING
TREX TRANSCEND (CROWN AND UNIVERSAL RAILING)

**NOTE:** Trex railing brackets are designed to be installed up to a 45° angle.

- **Small angles** (1° - 30°). Both 4" x 4" (102 mm x 102 mm) or 6" x 6" (152 mm x 152 mm) post sleeves work well.
- **Large angles** (31° - 45°). **USE ONLY** 6" x 6" (152 mm x 152 mm) post sleeves when installing on flat side.
- **45° angles using** 4" x 4" (102 mm x 102 mm) post sleeves **MUST** use Transcend Bird’s Mouth brackets.

**NOTE:** Railing will be installed on corner of posts.

- Using 6" x 6" (152 mm x 152 mm) post sleeves at 45° angles. Brackets are installed off-center and use 45° Transcend gaskets.
- Railing gaskets are designed to fit at 0°, 22.5°, and 45° angles. Gaskets are labeled with appropriate angle dimension.

HOW TO INSTALL CROWN AND UNIVERSAL BIRD’S MOUTH RAILING
TREX TRANSCEND

**NOTES:**
- Use with 4" x 4" (102 mm x 102 mm) post sleeve **ONLY**.
- Gaskets are only designed for use with Transcend Crown and Universal Railing.

Read all instructions before installation.

**PARTS**

1. **Mark Posts**
   1. Measure and mark 4" (102 mm) and 33-9/16" (852 mm) up from top of post skirt.
   2. **NOTE:** Without skirt, add 1-1/2" (38 mm) to measurements.

2. **Attaching Adapters**
   Snap adapters into RSBs.

3. **Pre-drill Bottom and Top RSBs**
   1. Position RSBs with adapter (**flat side DOWN**) for lower rail, mark and pre-drill screw holes with 1/8" (3 mm) drill bit on post.
   2. Position RSBs with adapter (**flat side UP**) for top rail, mark and pre-drill screw holes with 1/8" (3 mm) drill bit on post.
Measuring and Cutting Rails

4. Measure from corner-to-corner between posts. Mark 45° cuts on rails with template on assembly tool. Center of “V’s” is the distance from corner-to-corner for posts.

**NOTE:** Subtract 1/16” (1.6 mm) from each end to accommodate rail gaskets.

Attaching Top and Bottom RSBs

5. Attach RSBs with adapters to posts with wood screws (provided).

**NOTES:**
- Drill at slight inward angle to drill holes on marks.
- Lay cut lower rail into position on decking surface between the posts before attaching the lower RSB. There may be some difficulty attaching the lower rail if you fail to do this.

Using Miter Box Saw to Cut Rails

1. Place 2” x 4” (51 mm x 102 mm) on edge behind the rail to allow for complete cut.
2. Angle blade to 45°.
3. Set stop on saw so blade travels half the depth of rails. Several test cuts can be made on scrap material to accurately set the stop.
4. “V” cut both sides of the rail.

**NOTE:** Transcend’s Crown and Universal Rails will require different stop settings.

**HOW TO INSTALL CROWN AND UNIVERSAL STAIR RAILING**

Read all instructions BEFORE installation.

**NOTE:** All Transcend railings and gaskets ONLY WORK WITH STAIR SLOPES OF 32°-37°.

Installing Posts, Post Sleeve Skirts, and Post Sleeves for Stair Rails

1. Install posts, post sleeve skirts, and post sleeves according to standard Transcend railing instructions. See page 61.

**NOTE:** Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
2b. Set bottom and top rail along the nose of the stair treads, ensuring baluster holes are placed evenly. Also allow for a minimum of 1-1/2” (38 mm) at each end of rail for bracket placement and baluster clearance. Cut rails on marks.

NOTES:
» If using railing gaskets, subtract 1/16” (1.6 mm) maximum, from each end and cut.
» CUT VERY CAREFULLY TO NOT BREAK BALUSTER SPACERS.

Cutting Balusters on Angle (OPTIONAL)

2c. In order for balusters to seat properly (depending on the angle of the stair railing), the balusters may need to be trimmed to match the angle of the bottom and top railing.
2d. Carefully remove baluster spacers from rails.

3. Position bottom rail between posts and slide Trex Express™ railing assembly template into position with bottom rail outline on template aligned with end of bottom rail. Allow a minimum clearance of 1” (25 mm) from stair tread. Secure template with rubber bands. Remove rail.

Attaching RSBs to BOTTOM Post

4. Attach upper and lower RSBs to bottom post, **flat side UP**, with wood screws provided. Remove template and place a second RSB, turned upside down, and interlock on each bracket.

Positioning RSBs on UPPER Post

5. Position pre-cut bottom rail between posts. Slide Trex Express™ railing assembly template into position, aligning bottom rail outline on template with end of bottom rail. Use rubber bands to hold template in place. Remove rail.
Attaching RSBs to UPPER Posts

6. Attach upper and lower RSBs to top post, flat side DOWN. Remove template. Take second RSB, turn upside down and interlock into each bracket.

If Attaching Original Foot Block to Bottom Rail
7a. See detailed instructions included with foot block.

If Attaching New Foot Block to Bottom Rail
7b. See detailed instructions included with foot block.

Attaching Bottom Rail (Universal Rail)
8. Lift bottom rail so RSB’s are in the channel and attach with 3 self-tapping screws (provided). Use the three outer holes in RSB to attach screws.

Placing Baluster Spacers and Balusters

9. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer making sure that holes line up parallel. Place balusters in baluster spacer holes.

Attaching Top Rail
10a. Place top rail of choice (Crown rail shown here) on RSB’s in rail channel and attach with 3 self-tapping screws (provided). Use the three outer holes in RSB to attach screws.

10b. If installing a different railing configuration other than Crown Railing, refer to other Railing Configurations in Horizontal sections for additional requirements.

11. Slide baluster spacer up and snap into top rail.

Attaching Optional Gaskets
12. Stair railing gaskets are designed to fit at slopes of 32° to 37°. Gaskets are labeled in order to ensure correct location.

Attaching Post Caps and Installing New Foot Block
13. Secure post caps with silicone or PVC adhesive. Attach new foot block per foot block instructions.

NOTE: Clean-up any excess adhesive before it dries.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
TREX® SIGNATURE™ RAILING

NOTES:
» TREX® SIGNATURE™ POSTS CANNOT BE USED WITH TREX® SIGNATURE™ TRADITIONAL OR TREX® SIGNATURE™ COCKTAIL DESIGNS, ONLY PRESSURE-TREATED POSTS/POST SLEEVES CAN BE USED. REFER TO DETAILED INSTRUCTIONS FOR MORE INFORMATION.

» TREX® SIGNATURE™ RAILINGS ARE DESIGNED TO BE ATTACHED WITH POSTS INSTALLED AT A CLEAR SPAN OF 6’ (1.83 M) OR 8’ (2.44 M).

» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING POST-TO-POST CONFIGURATION, THE BOTTOM RAIL WILL NOT NEED TO BE CUT, BUT THE TOP RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT.

» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING CROSSOVER POST CONFIGURATION (SPANS FROM ONE CROSSOVER POST TO ANOTHER CROSSOVER POST), BOTH THE BOTTOM RAIL AND TOP RAIL WILL NOT NEED TO BE CUT.

» IN ADDITION, AT ALL FINAL END POST CONFIGURATIONS, TOP RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT.

» SEE INFORMATION WITHIN DETAILED INSTRUCTIONS FOR MORE INFORMATION.

» SEE PAGE 55 FOR SKU NUMBERS.

NOTE: THIS IS AN OVERVIEW OF ALL RAILING COMPONENTS FOR TREX® SIGNATURE™ HORIZONTAL APPLICATIONS – REFER TO DETAILED INSTRUCTIONS FOR SPECIFIC RAILING CONFIGURATIONS.

A. Trex® Signature™ top rail and crowned cover
- 6’ (actual length 73.5” [186.7 cm])
- 8’ (actual length 97.5” [247.7 cm])

B. Trex® Signature™ bottom rail and flat cover
- 6’ Rail (actual length 71.5” [181.6 cm])
- 6’ Cover (actual length 70.0” [177.8 cm])
- 8’ Rail (actual length 95.5” [242.6 cm])
- 8’ Cover (actual length 94.0” [238.8 cm])

C. Trex® Signature™ upper rail bracket and cover

D. Trex® Signature™ lower rail bracket and cover

E. Trex® Signature™ balusters (square or round)

F. Trex® Signature™ center baluster (square or round)

G. Trex® Signature™ foot block**

H. Trex® Signature™ post skirt or post sleeve skirt*

I. Trex® Signature™ post*
- 36” (actual length 37” [94.0 cm])
- 42” (actual length 43” [109.2 cm])
  or Trex post sleeve***
- 36” (actual length 39” [99.1 cm])
- 42” (actual length 45” [114.3 cm])

J. Trex® Signature™ crossover post*
- 36” (actual length 34.5” [87.6 cm])
- 42” (actual length 40.5” [102.9 cm])

K. Trex® Signature™ post cap or post sleeve cap*

L. Trex decking

M. Trex Fascia

N. Code-approved wood joist 2” x 8” (5.1 cm x 20.3 cm) or larger

O. Code-approved wood rim joist 2” x 8” (5.1 cm x 20.3 cm) or larger

P. Crossover bracket cover (supplied with crossover post)

* Item not included in Trex® Signature™ Railing kits.
** Required ONLY for All Clear Span Applications over 6’ (1.83 m) when smaller fixed baluster is fully centered, or unsupported spans greater than 5’ (1.52 m) (example: 8’ (2.44 m) span cut into one 5’ (1.52 m) span and one 3’ (0.91 m) span would require foot block under 5’ (1.52 m) span since smaller fixed baluster is no longer centered). Included with 8’ (2.44 m) railing kits.
*** Both 4” x 4” (10.2 cm x 10.2 cm) and 6” x 6” (15.2 cm x 15.2 cm) post sleeves are designed to fit over 4” x 4” pressure-treated post.

NOTE: If installing 42” (106.7 cm) railing, and using pressure-treated posts with Trex post sleeves, ensure that a longer pressure-treated post is used along with longer post sleeve, both cut to a height of 46” (116.8 cm) from decking surface.
IMPORTANT NOTES:
» EACH POST MUST BE ATTACHED AS SHOWN TO ENSURE A CODE-
COMPLIANT AND SAFE INSTALLATION.
» TREX® SIGNATURE™ POSTS CANNOT BE USED WITH TREX®
SIGNATURE™ TRADITIONAL OR TREX® SIGNATURE™ COCKTAIL
DESIGNS, ONLY PRESSURE-TREATED POST/POST SLEEVES
CAN BE USED. REFER TO DETAILED INSTRUCTIONS FOR MORE
INFORMATION.
» ALWAYS refer to your local building code official prior to installing
any railing system to ensure all code and safety requirements are met.
Trex cannot be held responsible for improper or non-recommended
installations.
» When installing Trex® Signature™ posts on ACQ, CCA or concrete
surfaces, use an appropriate isolation barrier between post and
surface (contact local building code official if needed).
» For installing Trex® Signature™ Post and/or Trex® Signature™ Crossover
Posts, see below.
» For pressure-treated posts, post sleeves, and skirts, see detailed
instructions provided with Trex® Signature™ Railing Kits.
» All Trex® Signature™ stair installations require the use of a 53” (1346
mm) stair post, measured and cut to appropriate length if necessary.
» If crossover stair post is required, use stair post (again cut to
appropriate length if necessary) and use swivel crossover bracket.
» If installing on concrete, make sure all surfaces are level.

TOOLS AND MATERIALS NEEDED
» Drill and/or screw gun (hammer drill for concrete)
» 1/2” (13 mm) drill bit for wood, 3/8” (10 mm) drill bit for concrete
» Blocking – 2” x 8” (51 mm x 203 mm) pressure-treated Southern
Yellow Pine or equivalent
» Qty: 36 (per post) – 3” pressure-treated compatible wood screws

CODE APPROVED POST APPLICATIONS

<table>

Installing Trex® Signature™ Posts and/or Trex®
Signature™ Crossover Posts on Pressure-Treated
Wood Framing (Corner Post Installation)

1. Install 2” x 8” (51 mm x 203 mm) cross bracing
frame in between joists at 7-1/4” (184 mm). Attach
a total of twelve 3” (76 mm) pressure-treated
compatible screws (not provided).

2. Install two 2” x 8” (51 mm x 203 mm) boards as
blocking under post location. Securely attach
blocking using a total of 24 3” (76 mm)
pressure-
treated compatible screws (not provided).

NOTE: TO ENSURE THE BLOCKING IS FULLY SECURE,
USE THE AMOUNT OF SCREWS indicated ABOVE.

TIP: Use two additional screws to "sandwich" blocking
boards together for easier attachment to framing.

Line Post Installation

3. Install two 2” x 8” (51 mm x 203 mm) cross bracing
frames in between joists at 7-1/4” (184 mm). Attach
a total of twelve 3” (76 mm) pressure-treated
compatible screws (not provided).

4. Install two 2” x 8” (51 mm x 203 mm) boards as
blocking under post location. Securely attach
blocking using a total of twenty-four 3” (76 mm)
pressure-
treated compatible screws (not provided).
INSTALLING TREX® SIGNATURE™ POSTS AND/OR TREX® SIGNATURE™ CROSSOVER POSTS ON WOOD OR CONCRETE/CONTINUED

NOTES:
» Metal backplate is only required for 2.5” (64 mm) post in IRC installations. (Consult local code official for more information.)

5. Using a post as a template, mark locations of holes.
6. Drill through decking and blocking boards using 5/8” diameter bit (long drill bit will be required).
7. Insert the (2) stainless steel barrier strips under the mounting bolt holes. BARRIER STRIPS ARE REQUIRED ONLY IF ATTACHING POST DIRECTLY TO PRESSURE TREATED FRAMING.
8. Attach posts using four 3/8” x 6” (10 mm x 152 mm) hex cap bolts, washers, and nuts, along with aluminum back plate on underside of blocking. If the project requires IRC compliance, this back plate MUST be installed under the decking to ensure this will meet code compliance. Reference SKU part number ALPOSTHWDECK for required hardware and aluminum plate. (Consult local code official for more information on IRC Compliance.)

INSTALLING PRESSURE-TREATED POSTS, POST SLEEVES, AND SKIRTS TO USE WITH TREX® SIGNATURE™ RAILING

1. Attach posts using 1/2” (13 mm) carriage bolts.
   » Minimum joist size is 2” x 8” (51 mm x 203 mm).
   » Top bolts must be 1” (25 mm) from top of joists.
   » Bottom bolts must be 5-1/8” (130 mm) from top bolts.

NOTE: Blocking can be added for extra strength.

2. Slide post sleeve skirt over post and down to rest on decking surface. Slide post sleeve over post and position inside post sleeve skirt.

NOTE: Shims can be used to plumb post sleeves.

Installing Trex® Signature™ Posts on Concrete Pre-Drilled Holes

1. Using post as a template, mark locations of the four holes and drill into concrete at least 2-5/8” (67 mm) using a 3/8” (10 mm) masonry bit.

NOTE: You can either set drill bit to correct depth on drill or mark drill bit with tape at required dimension to ensure all holes are drilled at correct depth.

2. Clean out holes to remove all concrete dust using a shop vacuum or other appropriate tool.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
3. Insert (2) stainless steel barrier stripes under mounting bolt holes. Use appropriate shims if posts are not plumb. Attach posts using four TREX SUPPLIED 3/8" x 3-3/4" (10 mm x 95 mm) wedge anchors. Reference SKU part number ALPOSTHWCONC for required hardware (wedge anchors, washers, and nuts).

**NOTES:**
» When using hammer to tap anchors in place, keep threaded nut at top of anchor in order to not damage threads.
» Recommended torque for anchors is 20 ft-lbs.

---

**TREX® SIGNATURE™ RAILING CONFIGURATIONS**

**Standard**
Cutting posts/post sleeves is **NOT** required.

A. Trex® Signature™ post, pressure-treated post or Trex Post Mounts* with Trex Transcend post sleeves, or Trex Joist Mount Posts
B. Trex® Signature™ top rail
C. Trex® Signature™ bottom rail
D. Trex® Signature™ balusters

See page 81 for “How to Install Standard Railing”.

**NOTES:** See specific installation instructions for attachment of Trex post mounts or Trex Joist Mount Posts prior to installing any railing.

---

**Cocktail**
Post sleeves will need to be cut.

A. Pressure-treated post with Trex Transcend post sleeve
   **NOTE:** Only for use with 4" x 4" (102 mm x 102 mm) post sleeve. Trex® Signature™ Posts, Trex Post Mounts or Joist Mount Posts cannot be used with Trex® Signature™ Cocktail design.
B. Deck board top rail. Note: Contour and Escapes cannot be used.
C. Trex® Signature™ top rail
D. Trex® Signature™ bottom rail
E. Trex® Signature™ balusters
F. Trex® Signature™ Cocktail Rail Bracket**

See page 92 for “How to Install Signature Cocktail Railing”.

---

**Traditional**
Cutting posts/post sleeves is **Not** required.

A. Pressure-treated post with Trex Transcend post sleeve
   **NOTE:** Only for use with 4" x 4" (102 mm x 102 mm) or 6" x 6" (152 mm x 152 mm) post sleeve. Trex® Signature™ Posts, Trex Post Mounts or Joist Mount Posts cannot be used with Trex® Signature™ Traditional design
B. 2" x 4" (51 mm x 102 mm) lateral top rail
C. Trex® Signature™ top rail
D. Trex® Signature™ bottom rail
E. Trex® Signature™ balusters
F. Trex® Signature™ Cocktail Rail Bracket**

See page 93 for “How to Install Trex® Signature™ Traditional Railing”.

**NOTE:** See specific installation instructions for attachment of Trex post mounts or Trex Joist Mount Posts prior to installing any railing.

---

**POST SLEEVES WILL NEED TO BE CUT**

**Signature Cocktail**

**Signature Traditional**

**Trex® Signature™ Cocktail Rail brackets (sold separately) are for use with either Trex® Signature™ Traditional or Trex® Signature™ Cocktail designs. For a 6’ section, use 4 brackets and screws provided, for 8’ section, use 5 brackets and screws provided.**

KK. Horizontal swivel bracket bottom rail
LL. Swivel base cover
How to Install Horizontal Railing
Trex® Signature™ Standard

NOTE: For ease of installation, it is recommended to use the Trex® Signature™ rail templates to attach brackets (sold separately).

Attach Brackets Using Trex® Signature™ Posts

TIP: Use a clamp to help hold brackets in place while fastening with screws.

1. Measure 1-3/8" (3.5 cm) from top of post base plate or 1-7/8" (4.8 cm) from decking surface. Mark with light line.

2. Measure up from post base plate 33-7/16" (84.9 cm) for 36" (92 cm) rail height or 39-7/16" (100.2 cm) for 42" (107 cm) rail height. Mark with light line.

NOTE: if measuring from decking surface, measure up 33-15/16" (86.2 cm) for 36" (92 cm) rail height or 39-15/16" (101.4 cm) for 42" (107 cm) rail height.

3. Center lower bracket on post above the marked line and attach using two self-tapping screws (provided).

4. Center upper bracket on post above marked line and attach using (3) self-tapping screws (provided).

NOTE: Upper bracket is not required on crossover post configuration.

Attach Brackets Using Pressure-Treated Posts and Post Sleeves

TIP: Use a clamp to help hold brackets in place while fastening with screws.

1. Measure 1-7/8" (4.8 cm) up from deck surface to bottom of bracket. Slide skirt up to allow for proper measurement. Mark with light line.

2. Measure up from decking surface 33-15/16" (86.2 cm) for 36" (92 cm) rail height or 39-15/16" (101.4 cm) for 42" (107 cm) rail height. Mark with light line.

NOTE: Push skirt back down onto surface of decking BEFORE ATTACHING BRACKETS.

3. Center lower bracket on post above the marked line and attach using two 2" (51 mm) wood screws (provided).

4. Center upper bracket on post below marked line and attach using three 2" (51 cm) wood screws (provided).

NOTE: Upper bracket is not required on crossover post configuration.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
How to Measure and Cut Bottom and Top Railings (When Required)

**1.** Position bottom and top rails between posts and align with bottom bracket. Align the center baluster slot in both rails with the middle of the span between posts.* This will allow an equal number of baluster holes on each side of center slot. Mark bottom rail and top rail at each end (ensure both rails are centered between posts).

* In some cases, due to odd railing spans, the center baluster may need to be offset in one direction to ensure there is enough room at both post locations for balusters to be placed, review this BEFORE cutting any railings to ensure all balusters are equally spaced.

**2.** Cut each end of bottom rail 1/4” (0.6 cm) shorter than mark on each end to allow for fit into bottom rail brackets.

**3.** Slide rail insert out and cut 3/4” (19 mm) FROM each side of insert, then slide back inside rail and center.

**4.** Mark and cut bottom rail cover 1-1/2” (38 mm) shorter than bottom rail.
**How to Install Horizontal Railing Post to Post (Continued)**

**Cutting Top Rail**

5. Cut each end of top rail 1/4" (0.6 cm) shorter than mark to allow for fit into top rail brackets.

**Cutting Top Rail Insert and Cover**

6. Slide rail insert out and cut 3/4" (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

7. Mark and cut top rail cover same length as top rail for all top rail configurations.

**Attaching Center Baluster to Bottom Rail**

8. Attach shorter, center baluster in center slot in bottom rail using two #8 x 1-1/4" (3.2 cm) screws (provided).

**Attaching Bottom Rail Cover and Bottom Rail to Brackets**

9. Attach “flat” bottom rail cover to bottom rail by first centering cover on bottom rail (this will allow gap on each end of bottom rail for placement into brackets). Align cover on one side of bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

*NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.*
10. Set bottom rail into bottom brackets. Tabs on brackets will be inside of bottom rail (not shown when railing is attached). To ensure fit into tab, measure and mark 1/2" (1.3 cm) out from side of post.

11. Attach bottom rail to bottom bracket by fastening through marked measurement on top of rail into tab on bottom bracket using one self-tapping screw each side (provided).

**NOTE:** Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of railing to bracket.

### Installing Remaining Balusters into Bottom Rail

12. Place remaining balusters into holes in lower rail by snapping fully into place. In some cases, **GENTLE** tapping with a rubber mallet may facilitate fastening.

### Attach Upper Railings

13. Working from one end of upper rail, snap balusters into upper rail working down length of rail. Fasten center baluster into center slot using two #8 x 1-1/4" (3.2 cm) screws (provided).

14. Fasten upper rail to each bracket by installing screws diagonally through upper rail into bracket using two self-tapping screws each side (provided).

**NOTE:** Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of railing to bracket.

15. Attach “crowned” upper rail cover to upper rail by aligning cover on one side of rail. Then starting from one end of rail, snap cover onto opposing slot working down length of rail. **GENTLE** tapping with a rubber mallet may facilitate fastening.
HOW TO INSTALL HORIZONTAL RAILING POST TO POST/CONTINUED

TREX® SIGNATURE™

Attachment of Bracket Covers, Skirts, and Caps

16. Attach corresponding bracket covers over opening in upper and bottom rails.
17. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.
18. Attach post caps to Trex® Signature™ posts. (Use of rubber mallet may be required for secure attachment.)
19. Attach post caps to post sleeves using external grade PVC construction adhesive.

HOW TO INSTALL HORIZONTAL RAILING POST TO CROSSOVER POST

TREX® SIGNATURE™

NOTES:
» TREX® SIGNATURE™ RAILINGS ARE DESIGNED TO BE ATTACHED WITH POSTS INSTALLED AT A CLEAR SPAN OF 6’ (1.83 M) OR 8’ (2.44 M).
» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING POST-TO-CROSSOVER POST CONFIGURATION, THE BOTTOM RAIL WILL NOT NEED TO BE CUT, BUT THE TOP RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT.
» AT ALL FINAL END POST CONFIGURATIONS, TOP RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT.
» FOR ODD SPAN LENGTHS, BOTH TOP RAIL AND BOTTOM RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT. ENSURE THAT BALUSTERS ARE SPACED WITH AN EQUAL DISTANCE ON EACH SIDE OF THE POST.
» WHEN RAILINGS ARE CUT TO ODD SPANS, ALL SPANS GREATER THAN 5’ (1.52 M) SPAN CUT INTO ONE 5’ (1.52 M) SPAN AND ONE 3’ (0.91 M) SPAN WOULD REQUIRE FOOT BLOCK UNDER 5’ (1.52 M) SPAN SINCE SMALLER FIXED BALUSTER IS NO LONGER CENTERED.

How to Measure, Mark and Cut Bottom and Top Railings (When Required)

1. Position bottom and top rails between posts and align with bottom bracket. Align the center baluster slot in both rails with the middle of the span between posts.* This will allow an equal number of baluster holes on each side of center slot. Mark bottom rail and top rail at each end (ensure both rails are centered between posts).

Important: DO NOT cut top rail the same length as bottom rail.

* In some cases, due to odd railing spans, the center baluster may need to be offset in one direction to ensure there is enough room at both post locations for balusters to be placed. Review this BEFORE cutting any railings to ensure all balusters are equally spaced.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL HORIZONTAL RAILING POST TO Crossover
POST/CONTINUED
TREX® SIGNATURE™

Cutting Bottom Rail and Bottom Rail Cover ONLY

2. Cut each end of bottom rail 1/4” (0.6 cm) shorter than mark on each end to allow for fit into bottom rail brackets.

3. Slide rail insert out and cut 3/4” (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

4. Mark and cut bottom rail cover 1-1/2” (3.8 cm) shorter than bottom rail.

Cutting Top Rail

5. Top rail must be cut differently on each side of the rail. Railing side that attaches to standard post should be cut 1/4” (0.6 cm) shorter than the mark to allow for fit into top rail bracket. Railing side that attaches to the crossover post should be cut 3/4” (1.9 cm) LONGER than the mark to allow for fit into the crossover post bracket.

Cutting Top Rail Insert and Cover

6. Slide rail insert out and cut 3/4” (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

7. Mark and cut top rail cover same length as top rail for all top rail configurations.
Attaching Center Baluster to Bottom Rail

8. Attach shorter, center baluster in center slot in bottom rail using two #8 x 1-1/4" (3.2 cm) screws (provided).

Attaching Bottom Rail Cover and Bottom Rail to Brackets

9. Attach “flat” bottom rail cover to bottom rail by first centering cover on bottom rail (this will allow gap on each end of bottom rail for placement into brackets). Align cover on one side of bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

10. Set bottom rail into bottom brackets. Tabs on brackets will be inside of bottom rail (not shown when railing is attached). To ensure fit into tab, measure and mark 1/2" (1.3 cm) out from side of post.

11. Attach bottom rail to bottom bracket by fastening through marked measurement on top of rail into tab on bottom bracket using one self-tapping screw each side (provided).

NOTE: Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of railing to bracket.

Installing Remaining Balusters into Bottom Rail

12. Place remaining balusters into holes in lower rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL HORIZONTAL RAILING POST TO CROSSOVER POST/CONTINUED
TREX® SIGNATURE™

Attach Upper Railings

13. Working from one end of upper rail, snap balusters into upper rail working down length of rail. Fasten center baluster into center slot using two #8 x 1-1/4" (3.2 cm) screws (provided).
14. At post location, fasten upper rail to each bracket by installing screws diagonally through upper rail into bracket using two self-tapping screws each side (provided).

NOTE: Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of railing to bracket.

15. At crossover post location, fasten upper rail to crossover post by installing screws diagonally through upper rail into post using two self-tapping screws each side (provided).

NOTE: Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of railing to bracket.

16. Attach “crowned” upper rail cover to upper rail by aligning cover on one side of rail. Then starting from one end of rail, snap cover onto opposing slot working down length of rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

Attachment of Bracket Covers, Skirts, and Caps

17. Attach corresponding bracket covers over opening in upper and bottom rails.
18. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

19. Attach post caps to Trex® Signature™ posts. (Use of rubber mallet may be required for secure attachment.)
20. Attach post caps to post sleeves using external grade PVC construction adhesive.
HOW TO INSTALL HORIZONTAL RAILING POST TO CROSSOVER POST/CONTINUED
TREX® SIGNATURE™

21. For crossover post configuration, attach crossover post cap to crossover post.

HOW TO INSTALL HORIZONTAL RAILING CROSSOVER POST TO CROSSOVER POST
TREX® SIGNATURE™ STANDARD

NOTES:

» TREX® SIGNATURE™ RAILINGS ARE DESIGNED TO BE ATTACHED WITH POSTS INSTALLED AT A CLEAR SPAN OF 6’ (1.83 M) OR 8’ (2.44 M).

» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING POST-TO-CROSSOVER POST CONFIGURATION, THE BOTTOM RAIL WILL NOT NEED TO BE CUT, BUT THE TOP RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT.

» FOR ODD SPAN LENGTHS, BOTH TOP RAIL AND BOTTOM RAIL WILL NEED TO BE MEASURED (MAKING SURE BALUSTERS LINE UP VERTICALLY) AND CUT. ENSURE THAT BALUSTERS ARE SPACED WITH AN EQUAL DISTANCE ON EACH SIDE OF THE POST.

» WHEN RAILINGS ARE CUT TO ODD SPANS, ALL SPANS GREATER THAN 5’ (1.52 M) (EXAMPLE: 8’ (2.44 M) SPAN CUT INTO ONE 5’ (1.52 M) SPAN AND ONE 3’ (0.91 M) SPAN) WOULD REQUIRE FOOT BLOCK UNDER 5’ (1.52 M) SPAN SINCE SMALLER FIXED BALUSTER IS NO LONGER CENTERED.

How to Measure, Mark and Cut Bottom and Top Railings (When Required)

1. Position bottom and top rails between posts and align with bottom bracket. Align the center baluster slot in both rails with the middle of the span between posts.* This will allow an equal number of baluster holes on each side of center slot. Mark bottom rail and top rail at each end (ensure both rails are centered between posts).

* In some cases, due to odd railing spans, the center baluster may need to be offset in one direction to ensure there is enough room at both post locations for balusters to be placed. Review this BEFORE cutting any railings to ensure all balusters are equally spaced.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL HORIZONTAL RAILING CROSSOVER POST TO CROSSED OVER POST/CONTINUED
TREX® SIGNATURE™

Cutting Bottom Rail and Bottom Rail Cover ONLY

1. Cut each end of bottom rail 1/4" (0.6 cm) shorter than mark on each end to allow for fit into bottom rail brackets.

2. Slide rail insert out and cut 3/4" (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

3. Mark and cut bottom rail cover 1-1/2" (3.8 cm) shorter than bottom rail.

Cutting Top Rail

4. Mark each end of top rail 3/4" (1.9 cm) LONGER than the mark to allow for fit into the crossover post brackets on each side.

5. Slide rail insert out and cut 3/4" (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

6. Mark and cut top rail cover same length as top rail for all top rail configurations.

7. Mark and cut top rail cover same length as top rail for all top rail configurations.
Attaching Center Baluster to Bottom Rail

8. Attach shorter, center baluster in center slot in bottom rail using two #8 x 1-1/4” (3.2 cm) screws (provided).

Attaching Bottom Rail Cover and Bottom Rail to Brackets

9. Attach “flat” bottom rail cover to bottom rail by first centering cover on bottom rail (this will allow gap on each end of bottom rail for placement into brackets). Align cover on one side of bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

10. Set bottom rail into bottom brackets. Tabs on brackets will be inside of bottom rail (not shown when railing is attached). To ensure fit into tab, measure and mark 1/2” (1.3 cm) out from side of post.

11. Attach bottom rail to bottom bracket by fastening through marked measurement on top of rail into tab on bottom bracket using one self-tapping screw each side (provided).

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of railing to bracket.

Installing Remaining Balusters into Bottom Rail

12. Place remaining balusters into holes in lower rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.
Attach Upper Railings

13. Working from one end of upper rail, snap balusters into upper rail working down length of rail. Fasten center baluster into center slot using two #8 x 1-1/4” (3.2 cm) screws (provided).

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of railing to bracket.

14. At post locations, fasten upper rail to crossover post by installing screws diagonally through upper rail into post using two self-tapping screws each side (provided).

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of railing to bracket.

15. Attach “crowned” upper rail cover to upper rail by aligning cover on one side of rail. Then starting from one end of rail, snap cover onto opposing slot working down length of rail. GENTLE tapping with a rubber mallet may facilitate fastening.

Attachment of Bracket Covers, Skirts, and Caps

16. Attach corresponding bracket covers over opening in bottom rails.

17. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

18. Attach crossover post cap to crossover post.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX® SIGNATURE™ COCKTAIL RAILING

TREX® SIGNATURE™

IMPORTANT NOTE:
» ONLY for use with pressure-treated 4 x 4 post (3.5” nominal square) and 4” x 4” (102 mm x 102 mm) post sleeve. Trex® Signature™ posts, Trex post mounts or joist mount posts cannot be used with Trex® Signature™ Cocktail railing. Cutting post and post sleeve only apply to the Cocktail style railing.

Installing Pressure-treated Posts, Post Sleeves, and Skirts to Use with Trex® Signature™ Railing

1a. Attach posts using 1/2” (13 mm) carriage bolts.
» Minimum joist size is 2” x 8” (51 mm x 203 mm).
» Top bolts must be 1” (25 mm) from top of joists.
» Bottom bolts must be 5-1/8” (130 mm) from top bolts.

NOTE: Blocking can be added for extra strength.

1b. Slide post sleeve skirt over post and down to rest on decking surface. Slide post sleeve over post and position inside post sleeve skirt.

NOTE: Shims can be used to plumb post sleeves.

Cutting Post and Post Sleeve

2. Mark and cut post and post sleeve measuring from deck surface:
» 36-1/32” (915 mm) for 36” (914 mm) height.
» 42-1/32” (1068 mm) for 42” (1067 mm) height.

3. Installing Horizontal Fixed Brackets
See instructions on page 80.

4. Installing Horizontal Swivel Brackets
See instructions on page 95.

5. Cutting Railings for Horizontal Fixed Brackets
See instructions on page 81 Post-to-Post, 84 Post-to-Crossover Post, or 88 Crossover Post-to-Crossover Post.

6. Cutting Railings for Horizontal Swivel Brackets
See instructions on page 96.

7. Attaching Center Baluster to Bottom Rail
See instructions on page 82 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

8. Attaching Bottom Rail Cover and Bottom Rail to Brackets
See instructions on page 82 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

9. Installing Remaining Balusters into Bottom Rail
See instructions on page 83 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

10. Attaching Top Rail and Top Rail Cover
See instructions on page 83 Post-to-Post, 87 Post-to-Crossover Post, or 91 Crossover Post-to-Crossover Post.

NOTE: Top Bracket Covers are not attached in this configuration.

11. Attaching Deck Board to Top Rail
Place deck boards (DO NOT use Escapes or Contour deck boards for top rail) over top rails. Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end).

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX® SIGNATURE™ COCKTAIL RAILING/CONTINUED

12. Secure boards to top rail using Trex® Signature™ Cocktail Bracket (sold separately). Ensure that there is a bracket at each end of the railing section, then space brackets approximately every 24” and attach with 4 screws provided.

13. Use scarf cut for posts where two deck boards meet.

**NOTES:**
» Leave 1/8” (3 mm) gap between deck boards.
» Deck boards can overhang end of last post maximum 1/2” (13 mm).

14. Attachment of Bottom Bracket Covers and Skirts
See instructions on page 85.

---

**HOW TO INSTALL TREX® SIGNATURE™ TRADITIONAL RAILING**

**TREX® SIGNATURE™**

1. **Installing Posts, Post Sleeve Skirts and Post Sleeves**
   See instructions on page 77.

2. **Installing Horizontal Fixed Brackets**
   See instructions on page 80.

3. **Installing Horizontal Swivel Brackets**
   See instructions on page 95.

4. **Cutting Railings for Horizontal Fixed Brackets**
   See instructions on page 81 Post-to-Post, 84 Post-to-Crossover Post, or 88 Crossover Post-to-Crossover Post.

5. **Cutting Railings for Horizontal Swivel Brackets**
   See instructions on page 96.

6. **Attaching Center Baluster to Bottom Rail**
   See instructions on page 82 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

7. **Attaching Bottom Rail Cover and Bottom Rail to Brackets**
   See instructions on page 82 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

8. **Installing Remaining Balusters into Bottom Rail**
   See instructions on page 83 Post-to-Post, 86 Post-to-Crossover Post, or 90 Crossover Post-to-Crossover Post.

9. **Attaching Top Rail and Top Rail Cover**
   See instructions on page 83 Post-to-Post, 87 Post-to-Crossover Post, or 91 Crossover Post-to-Crossover Post.

**NOTE:** Top Bracket Covers are not attached in this configuration.

10. **Attaching 2” x 4” (51 mm x 102 mm) to Top Rail**
    Measure between posts and cut 2” x 4” (51 mm x 102 mm) to length.

---

**NOTE:** Pre-drilling before attachment is recommended.
**HOW TO INSTALL TREX® SIGNATURE™ TRADITIONAL RAILING/CONTINUED**

11. Place 2” x 4” (51 mm x 102 mm) on Trex® Signature™ top rail.

12. Secure 2” x 4” (51 mm x 102 mm) to top rail using Trex® Signature™ Cocktail Bracket (sold separately). Ensure that there is a bracket at each end of the railing section, then space brackets approximately every 24” and attach with 4 screws provided.

**NOTE:** Pre-drilling before attachment is recommended.

13. toenail 2-1/2” (6.4 cm) screw at each end of 2” x 4” (5.1 cm x 10.2 cm) into post on back side of rail (side not facing decking).

14. **Attachment of Bottom Rail Bracket Covers and Caps**
   See instructions on page 84.

---

**HOW TO INSTALL FOOT BLOCKS–HORIZONTAL RAILING**

**TREX® SIGNATURE™**

**Attachment of Foot Block (Required ONLY for All Clear Span Applications Over 6’ [1.83 m])**

1. To ensure correct location, place foot block under center of bottom rail. Mark to provide placement location of base.

2. Place base (smaller side facing down) on decking surface. Attach base of foot block using one screw at an angle through base and into decking.

**NOTE:** Pre-drilling is recommended (1/8” [0.32 cm] drill bit) for attachment of base.

3. After attached, use a rubber mallet along with scrap piece of wood to tap foot block until it locks into place.
INSTALLATION OF HORIZONTAL SWIVEL BRACKETS
TREX® SIGNATURE™ STANDARD

Attach Swivel Brackets Base Using Trex®
Signature™ Posts
TIP: Use a clamp to help hold brackets in place
while fastening with screws.

1. Measure 1-3/8”
   (3.5 cm) from top of
post base plate or
1-7/8” (4.8 cm) from
decking surface.
Mark with light line.

2. Center lower bracket on post above
   the marked
line and attach using four self-tapping screws
(provided).

3. Measure up 32-5/16” (82.0 cm)
or 38-5/16” (97.3 cm) from
top of lower rail
bracket. Mark with a light line.

4. Center upper bracket on post
   below marked line
and attach using four self-tapping
screws (provided).

NOTE: Upper bracket
is not required on
crossover post
configuration.

Attach Swivel Brackets Using Pressure-treated
Posts and Post Sleeves
TIP: Use a clamp to help hold brackets in place
while fastening with screws

1. Measure 1-7/8” (4.8 cm) up from deck surface
to bottom of bracket. Slide skirt up to allow for
proper measurement, then push skirt back down
to surface of decking BEFORE ATTACHING
BRACKET. Mark with light line.

2. Center lower bracket on post above the marked
   line and attach using four 2” (5.1 cm) wood
   screws (provided).

3. Measure up 32-5/16” (82.0 cm)
or 38-5/16” (97.3 cm) from
top of lower rail
bracket. Mark with a light line.

4. Center upper bracket on post below marked line
   and attach using four 2” (5.1 cm) wood screws
   (provided).

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
INSTALLATION OF HORIZONTAL SWIVEL RAILING
TREX® SIGNATURE™ STANDARD

NOTES:
» WHEN USING TREX® SIGNATURE™ HORIZONTAL SWIVEL BRACKETS, BOTH BOTTOM AND TOP RAILS WILL NEED TO BE MEASURED AND CUT TO APPROPRIATE LENGTHS.

» HORIZONTAL SWIVEL BRACKETS CAN BE USED UP TO A 50° ANGLE FOR TREX® SIGNATURE™ RAILINGS.

» WHEN USING HORIZONTAL SWIVEL BRACKETS VERY IMPORTANT TO LAY OUT LOCATION AND ORIENTATION OF POSTS AND SWIVEL BRACKETS BEFORE INSTALLING SWIVEL BRACKETS.

» WHEN RAILINGS ARE CUT TO ODD SPANS, ALL SPANS GREATER THAN 5’ (1.52 M) (EXAMPLE: 8’ (2.44 M) SPAN CUT INTO ONE 5’ (1.52 M) SPAN AND ONE 3’ (0.91 M) SPAN) WOULD REQUIRE FOOT BLOCK UNDER 5’ (1.52 M) SPAN SINCE SMALLER FIXED BALUSTER IS NO LONGER CENTERED.

How to Measure and Cut Bottom and Top Railings

1. With brackets in correct swivel location, measure distance from inside of bracket to inside of bracket. ENSURE THAT BEFORE CUTTING, BALUSTERS HOLES ON BOTH BOTTOM AND TOP RAIL LINE UP. ALSO MAKE SURE CENTER BALUSTER SLOT IS AS CLOSE TO THE MIDDLE OF THE SPAN AS POSSIBLE. In some cases, due to odd railing spans, the center baluster may need to be offset in one or the other direction to ensure there is enough room at both post locations for balusters to be placed.

2. Cut bottom rail to the measurement between the bottom swivel brackets.

3. Slide rail insert out and cut 3/4” (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

4. Mark and cut bottom rail cover 1-1/2” (3.8 cm) shorter than bottom rail.
INSTALLATION OF HORIZONTAL SWIVEL RAILING/CONTINUED
TREX® SIGNATURE™ STANDARD

Cutting Top Rail
Option 1:
For Post-to-Post Configuration

1. Cut top rail to the measurement between the top swivel brackets. For standard post-to-standard post configurations this would be same dimensions as that of the bottom rail.

Cutting Top Rail Insert and Cover

6. Slide rail insert out and cut 3/4" (1.9 cm) FROM EACH SIDE of insert, then slide back inside rail and center.

7. Mark and cut top rail cover same length as top rail for all top rail configurations.

8. Attaching Center Baluster to Bottom Rail
See instructions on page 82 Post-to-Post or 86 Post-to-Crossover Post.

9. Attaching Bottom Rail Cover and Bottom Rail to Brackets
See instructions on page 84 Post-to-Post or 87 Post-to-Crossover Post.

10. Installing Remaining Balusters into Bottom Rail
See instructions on page 83 Post-to-Post or 86 Post-to-Crossover Post.

11. Attach Upper Railings
See instructions on page 83 Post-to-Post or 87 Post-to-Crossover Post.

12. Attachment of Bracket Covers, Skirts, and Caps
See instructions on page 84 Post-to-Post or 87 Post-to-Crossover Post.

13. Attachment of Foot Block (Required ONLY for All Clear Span Applications Over 6’ [1.83 m])
See instructions on page 94.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
BRACKET HARDWARE – STAIR APPLICATIONS (INCLUDING STAIR SWIVEL BRACKETS, STAIR CROSSOVER BRACKET, AND COMPOUND SWIVEL BRACKETS)

OO. Post-to-Bracket Fasteners
IMPORTANT NOTES:

» TREX® SIGNATURE™ POSTS CANNOT BE USED WITH TREX® SIGNATURE™ TRADITIONAL OR TREX® SIGNATURE™ COCKTAIL STAIR DESIGNS, ONLY PRESSURE-TREATED POST/POST SLEEVES CAN BE USED. REFER TO DETAILED INSTRUCTIONS FOR MORE INFORMATION.

» All Trex® Signature™ stair installations require the use of 53” (134.6 CM) stair post, measured and cut to appropriate length if required.

» If crossover stair post is required, use stair post (again cut to appropriate length if required) and use swivel crossover bracket.

» Trex® Signature™ Stair fixed brackets are designed to work only with stair slopes of 32°-37°.

» For smaller (less than 32°) or larger angles (greater than 37°), use the Trex® Signature™ Stair Swivel brackets.

» Trex® Signature™ Compound swivel stair brackets are designed for flared stair designs.

» If installing stair railings at exact span lengths of 6' (1.8 M) or 8' (2.4 M) and using post-to-post configuration, the bottom stair rail will not need to be cut*, but the top stair rail will need to be measured (making sure balusters line up vertically) and cut.

» If installing stair railings at exact span lengths of 6' (1.8 M) or 8' (2.4 M), and using crossover post configuration (spans from one crossover post to another crossover post), both the bottom and top stair rails will not need to be cut* if the angle is approximately 34°.

» At all final end post configurations, top stair rail will need to be measured (making sure balusters line up vertically) and cut.

» For odd span lengths, both bottom and top stair rails will need to be measured (making sure balusters line up vertically) and cut. Also, ensure that balusters are spaced with equal distance on each side of the post.

» Rails that do not require cutting must be oriented in the correct direction to ensure balusters are spaced properly when installed in brackets. On both bottom and top stair railings, baluster hole closest to the end of each stair rail is to be installed at the top of the stair section. Ensure that both bottom and top rails are correct and balusters line up vertically before INSTALLING.

Installing Standard Trex® Signature™ Stair Posts, Trex® Signature™ Stair Crossover Posts, or Pressure-treated Post, Post Sleeves and Skirts

1. Make sure 53” (135.6 cm) posts are used for all stair posts.

2. If Trex® Signature™ stair posts are used, install at nose of stair tread directly under required blocking. See Trex® Signature™ horizontal post instructions on pages 76-78 for details.

3. If pressure-treated post/post sleeves are used, posts are to be installed to the inside of the last stair stringer (rails must be over decking surface). See pressure-treated post instructions on pages 77-78 for details.
ATTACHING FIXED STAIR BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES
TREX® SIGNATURE™

NOTES:
» All Trex® Signature™ fixed stair brackets work ONLY with stair slopes of 32°-37°.
» Illustrations shown are representations when using Trex® Signature™ post, but same rules apply if using pressure-treated posts and post sleeves.
» Use a clamp to help hold stair brackets in place while fastening with screws.
IMPORTANT NOTE:
» BEFORE ATTACHING ANY UPPER BRACKETS MAKE SURE PROPER RAILING HEIGHTS ARE ACHIEVED. RAILING HEIGHTS AND UPPER BRACKET HEIGHTS MAY NEED TO BE ADJUSTED, HOWEVER, DO NOT REDUCE HEIGHTS BASED ON YOUR RAILING CODE REQUIREMENTS. MEASURE CAREFULLY AS DIMENSION HEIGHTS MAY NEED TO BE ADJUSTED!

1. Lay bottom stair rail on steps beside posts. Position bottom rail at least 1” (2.5 cm) above nose of stair tread.

Tip: Use a 1” (2.5 cm) deck board as a spacer board and clamp rails to post. Mark where lower brackets are to be attached to both posts. Mark at underside of railing location.

Installing Lower Fixed Stair Brackets

2. Center lower stair bracket on post above the marked line and attach using two self-tapping screws (provided). In some cases it may be difficult to attach the stair bracket on the lower stair post. A 90° cordless drill is recommended to attach screws in this area (if possible).

3. Position bottom stair rail along the nose of the stair treads. Ensure that before cutting, balusters holes are centered in between the posts and also allow for clearance for attachment to brackets. On top stair post location, mark UNDERSIDE of lower rail. On bottom stair post location mark TOPSIDE of lower rail at angled intersection of the bracket.

4. Cut each end of the bottom stair rail, rail insert, and bottom rail cover 1/4” (0.6 cm) shorter than the mark on each end to allow for fit into bottom stair rail brackets.

NOTE: Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.
5. Attach “flat” bottom stair rail cover to bottom stair rail. Align cover on one side of the bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of the rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

6. Set bottom stair rail into bottom stair rail brackets. Attach bottom stair rail to bottom stair bracket using two self-tapping screws (provided) on each side of bracket.

Installing Upper Fixed Stair Brackets and Measuring Upper Rail

IMPORTANT NOTE: BEFORE CUTTING ANY TOP RAILS, MAKE SURE THAT ALL BALUSTER HOLES LINE UP PARALLEL WHEN MEASURING!

7. Place two balusters into lower rail at each end closest to post.

8. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and ENSURE that balusters are parallel with post.

9. Mark a light line on posts at UNDERSIDE of rail to show the location of the fixed stair brackets.

10. Remove upper stair rail and center upper stair fixed bracket on post above the marked line and attach using two self-tapping screws (provided).
ATTACHING FIXED STAIR BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

TREX® SIGNATURE™

11. On top stair post location, mark **UNDERSIDE** of upper rail. On bottom stair post location mark **TOPSIDE** of upper rail at angled intersection inside the bracket.

**Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover**

12. Cut each end of top stair rail along with rail insert **1/4” (0.6 cm)** shorter than mark to allow for fit into top stair rail bracket.

**NOTE:** Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.

13. Mark and cut top rail cover same length as top rail for all top rail configurations.

14. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. **GENTLE** tapping with a **rubber mallet** may facilitate the fastening.

**Installing Balusters into Bottom Stair Rail**

15. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, **GENTLE** tapping with a **rubber mallet** may facilitate fastening.
ATTACHING FIXED STAIR BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

TREX® SIGNATURE™

Attaching Upper Stair Rails

16. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

17. Attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of stair railing to stair bracket.

Attachment of Stair Bracket Covers, Skirts, and Caps

18. Attach corresponding bracket covers over opening in upper and bottom rails.

19. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

20. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES

TREX® SIGNATURE™

NOTES:
» Illustrations shown are representations when using Trex® Signature™ post, but same rules apply if using pressure-treated posts and post sleeves.
» Use a clamp to help hold stair brackets in place while fastening with screws.

IMPORTANT NOTE:
» BEFORE ATTACHING ANY UPPER BRACKETS, MAKE SURE PROPER RAILING HEIGHTS ARE ACHIEVED. RAILING HEIGHTS AND UPPER BRACKET HEIGHTS MAY NEED TO BE ADJUSTED, HOWEVER, DO NOT REDUCE HEIGHTS BASED ON YOUR RAILING CODE REQUIREMENTS. MEASURE CAREFULLY AS DIMENSION HEIGHTS MAY NEED TO BE ADJUSTED!

1. Lay bottom stair rail on steps beside posts.
   Position bottom rail at least 1" (2.5 cm) above nose of stair tread.

   Tip: Use a 1" (2.5 cm) deck board as a spacer board and clamp rails to post. Mark where lower brackets are to be attached to both posts. Mark at underside of railing location.

Installing Lower Stair Swivel and Compound Swivel Brackets

2. Center lower stair swivel bracket on post above the marked line and attach using four self-tapping screws (provided). In some cases it may be difficult to attach the stair bracket on the lower stair post. A 90° cordless drill is recommended to attach screws in this area (if possible).

How to Measure Bottom Stair Railings (WHEN REQUIRED)

3. With brackets in correct swivel locations, measure distance from inside of swivel bracket to inside of swivel bracket. Ensure that before cutting, balusters holes are parallel and centered in between the posts and also allow for clearance for attachment to brackets. Mark bottom stair rail at each intersection.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover, and Attachment of Bottom Stair Rail Cover

4. Cut each end of the bottom rail, rail insert, and bottom rail cover at the mark on each end to allow for fit into bottom stair rail brackets.

   NOTE: Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

5. Attach “flat” bottom stair rail cover to bottom stair rail. Align cover on one side of the bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of the rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

6. Set bottom stair rail into bottom stair rail brackets. Attach bottom stair rail to bottom stair bracket using two self-tapping screws (provided) on each side of bracket.

7. Place two balusters into lower rail at each end closest to post.

8. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and ENSURE that balusters are parallel with post.

Installing Upper Stair Swivel and Compound Swivel Brackets

9. Clamp brackets to side of rail with brackets in correct swivel location/angle (this is important to ensure correct location of swivel brackets).

10. Mark a light line on posts at UNDERSIDE of where swivel bases (positioned correctly) meets the posts.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
11. Remove upper stair rail from balusters and center upper stair swivel bracket on post above the marked line and attach using four self-tapping screws (provided).

12. Cut top rail along with rail insert to the measurement between the top stair swivel brackets. For standard post to standard post configurations this would be same dimensions as that of the bottom stair rail.

13. Mark and cut top rail cover same length as top rail for all top rail configurations.

14. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. GENTLE tapping with a rubber mallet may facilitate fastening.

15. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

16. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

17. Attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of stair railing to stair bracket.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO TREX® SIGNATURE™ POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

**ATTACHING CROSSOVER SWIVEL BRACKET ON SIGNATURE POST**

1. Follow previous instructions for installation of lower stair rail into either fixed or swivel brackets.
2. Place two balusters into lower stair rail at each end of post.
3. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and **ENSURE** that balusters are parallel with post.
4. Follow previous instructions marking and installation of either fixed or swivel bracket where this is required.

**ATTACHING CROSSOVER SWIVEL BRACKET TO POST**

5. Insert stair crossover swivel bracket into post.

*NOTE: Keep the bracket cover on when inserting this into post, this will cover the screw attachment area.*
ATTACHING CROSSOVER SWIVEL BRACKET ON TREX® SIGNATURE™ POST/CONTINUED

TREX® SIGNATURE™

6. Determine location/height of the stair crossover swivel bracket by aligning the angle of this with the fixed brackets (or compound swivel brackets) already installed (posts can be cut if necessary).

7. Once location/height is determined, center and pre-drill two holes (using a drill bit slightly smaller than that of self-tapping screw diameter) on opposite sides of post, approx. 1/4" (0.6 cm) from top of post. Drill through the post and into the stair crossover swivel bracket on each side.

8. Attach stair crossover swivel bracket to post with two self-tapping screws (provided). Slide cover over post to hide screws.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
ATTACHING RAILS IN CROSSOVER POST APPLICATIONS
TREX® SIGNATURE™

Cutting Top Stair Rail and Insert
For Stair Post-to-Stair Crossover Post Configuration

When Using Fixed Stair Brackets:

9a. Top stair rail along with rail insert must be cut differently on each side of the rail. Railing side that attaches to standard post should be cut 1/4” (0.6 cm) shorter than the mark to allow for fit into top rail bracket. Railing side that attaches to the crossover post should be cut directly on the mark to allow for fit into the crossover post bracket.

When using Upper Stair Swivel and Stair Crossover Swivel Brackets:

9b. When going from standard stair post to stair crossover post, measurement must be taken from inside of top horizontal stair swivel bracket to inside lip of stair crossover bracket. Crossover post will need to be modified to have swivel crossover bracket installed.

Cutting Top Stair Rail and Rail Insert
For Stair Crossover Post-to-Stair Crossover Post Configuration

10. Cut each end of the top stair rail along with rail insert on the mark line to allow for fit into the crossover post bracket on each side.

Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover

11. Mark and cut top rail cover same length as top rail for all top rail configurations.

12. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then, starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. GENTLY tapping with a rubber mallet may facilitate fastening.
ATTACHING RAILS IN CROSSOVER POST APPLICATIONS/CONTINUED
TREX® SIGNATURE™

Installing Balusters into Bottom Stair Rail

13. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

Attaching Upper Stair Rails

14. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

15a. For stair post-to-post configuration, attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

15b. For stair crossover post configuration, fasten upper stair rail to swivel crossover post bracket by installing screws diagonally through crossover stair bracket into upper rail using two self-tapping screws (provided) on each side.

NOTE: Pre-drilling is required (7/64" [0.28 cm] drill bit) for attachment of stair railing to stair bracket.

Attachment of Stair Bracket Covers, Skirts, and Caps

16. Attach crossover bracket covers over opening in upper rails.
17. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

18. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).
19. Attach post caps to post sleeves using external grade PVC construction adhesive.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
IMPORTANT NOTES:
» Only for use with pressure-treated 4 x 4 post (3.5” nominal square) and 4” x 4” (102 mm x 102 mm) post sleeve. Trex® Signature™ posts, Trex post mounts or joist mount posts cannot be used with Trex® Signature™ Cocktail stair railing. Cutting post and post sleeve only apply to the Cocktail style railing.
» DO NOT CUT POST/POST SLEEVES UNTIL TOP RAILING AND COVER IS FULLY INSTALLED.
» When referring to previous instructions referenced, disregard all crossover post instructions as these cannot be used with Cocktail railing.
» THE DECK BOARD USED IN TREX® Signature™ Cocktail will need to terminate at the top of the post as shown above. The deck board will have to toenailed into the side of the post in these areas using 2 appropriate composite decking screws – pre-drilling is recommended.

Installing Pressure-treated Posts, Post Sleeves, and Skirts to Use with Trex® Signature™ Railing
1. See instructions on page 77.

Installing Brackets
2. Follow previous stair instructions for the installation of desired brackets, making sure that all dimensions are calculated before installation, and ensuring deck board is placed in correct location.
   See instructions on pages 101-102 for fixed stair brackets and 104-106 for swivel stair brackets.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover and Attachment of Bottom Stair Rail Cover
3. See instructions on page 101 fixed stair brackets and pages 104-105 for swivel stair brackets.

How to Measure Top Stair Railings (WHEN REQUIRED)
4. See instructions on page 101 fixed stair brackets and 105 for swivel stair brackets.

Cutting Top Stair Rail and Rail Insert When using Fixed Stair Brackets
5a Cut each end of top stair rail along with rail insert 1/4” (0.6 cm) shorter than mark to allow for fit into top stair rail bracket.
   NOTE: THE TOP RAIL WILL NEED TO BE CUT AT APPROPRIATE ANGLE ON THE END OF THE RAIL THAT CONNECTS TO THE UPPER FIXED BRACKET, SO THAT WHEN THE RAIL IS INSTALLED IT SITS FLUSH WITH THE END OF THE BRACKET AS SHOWN.

Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover
6. See instructions on page 106.

Installing Balusters into Bottom Stair Rail
7. See instructions on page 106.

Attaching Upper Stair Rails
8. See instructions on page 106.
HOW TO INSTALL TREX® SIGNATURE™ COCKTAIL STAIR RAILING
TREX® SIGNATURE™/CONTINUED

Cutting Post and Post Sleeve and Attaching Deck Board to Top Rail

9. Cut post and post sleeves at proper angle so these are flush with the top of the top brackets and/or top rail cover. BE CAREFUL NOT to CUT brackets.

10. Place deck boards (DO NOT use Escapes or Contour deck boards for top rail) over top rails. PLACE DECK BOARD ON TOP RAIL TO CHECK FOR PROPER FIT AND RAIL CLEARANCE AT BRACKET LOCATIONS. DECK BOARD MAY REQUIRE EITHER A NOTCH CUT ON THE UNDERSIDE OR SLIGHT PLANING ON THE UNDERSIDE TO ALLOW DECK BOARD TO CLEAR TOPS OF BRACKETS AND SIT FLUSH ON TOP OF POSTS AND RAILS. Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end).

11. Secure boards to top rail using Trex® Signature™ Cocktail Bracket (sold separately). Ensure that there is a bracket at each end of the stair railing section, then space brackets approximately every 24” and attach with 4 screws provided.

NOTE: Pre-drilling before attachment is recommended.

12. Use scarf cut for posts where two deck boards meet.

NOTES:
» Leave 1/8” (3 mm) gap between deck boards.
» Deck boards can overhang end of last post maximum 1/2” (13 mm).

13. Where deck board terminates at top of post horizontal deck board, PREDRILL and toenail two approved composite deck screws as shown into post, being careful to avoid hitting stair bracket.

Attachment of Bracket Covers and Skirts

NOTE: Top Bracket Covers are not attached in this configuration.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
IMPORTANT NOTE:
» Only for use with pressure-treated 4 x 4 post (3.5” nominal square) and 4” x 4” (102 mm x 102 mm) or 6” x 6” post sleeve. Trex® Signature™ Posts, Trex Post Mounts or Joist Mount Posts cannot be used with Trex® Signature™ Traditional railing.

Installing Standard Trex® Signature™ Stair Posts, or Pressure-treated Post
1. See instructions on page 100.

Installing Lower Fixed Stair Brackets
2a. See instructions on page 100.

Installing Lower Stair Swivel and Compound Swivel Brackets
2b. See instructions on page 104.

How to Measure Bottom Stair Railings
Fixed Stair Brackets
3a. See instructions on page 100.

How to Measure Bottom Stair Railings When using Stair Swivel and Compound Swivel Brackets
3b. See instructions on page 104.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover
When Using Fixed Stair Brackets
4a. See instructions on page 101.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover
When Using Stair Swivel and Compound Swivel Brackets
4b. See instructions on page 101.

Attachment of Bottom Stair Rail Cover and Bottom Stair Rail to Fixed Brackets
5a. See instructions on page 101.

Attachment of Bottom Stair Rail Cover and Bottom Stair Rail to Swivel and Compound Swivel Brackets
5b. See instructions on page 101.

Installing Balusters into Bottom Stair Rail
6a. See instructions on page 103.

Installing Balusters into Bottom Stair Rail
6b. See instructions on page 103.

Installing Upper Fixed Stair Brackets and Measuring Upper Rail
7a. See instructions on pages 101-102.

Installing Upper Swivel and Swivel Compound Stair Brackets and Measuring Upper Rail
7b. See instructions on pages 105-106.

Cutting Top Stair Rail and Rail Insert When Using Fixed Stair Brackets
8a. See instructions on page 102.

Cutting Top Stair Rail and Rail Insert When Using Swivel Compound Stair Brackets and Measuring Upper Rail
8b. See instructions on page 106.

Attaching Upper Stair Rails
9a. See instructions on page 103.

Attaching Upper Stair Rails
9b. See instructions on page 106.

Attaching 2”x 4” to Top Rail
10. Place 2” x 4” (51 mm x 102 mm) beside top rail. Mark and cut (both ends need to be cut on an angle for proper fit).
11. Place 2” x 4” (51 mm x 102 mm) on Trex® Signature™ top stair rail.

12. Secure 2” x 4” (51 mm x 102 mm) to top rail using Trex® Signature™ Cocktail Bracket (sold separately). Ensure that there is a bracket at each end of the railing section, then space brackets approximately every 24” and attach with 4 screws provided.

**NOTE:** Pre-drilling before attachment is recommended.

13. Pre-drill a pilot hole and toenail 2-1/2” (6.4 cm) screw at each end of 2” x 4” (5.1 cm x 10.2 cm) into post on back side of rail (side not facing decking).

**Attachment of Lower Stair Bracket Covers, Skirts, and Caps Fixed Bracket**
14a. See instructions on page 103.

**Attachment of Lower Stair Bracket Covers, Skirts, and Caps Swivel or Compound Swivel Bracket**
14b. See instructions on page 107.

**NOTE:** Top Bracket Covers are not attached in this configuration.
1. Measure opening between posts (gates can be customized to fit nearly any opening up to 48” [1219 mm] wide).
2. Subtract 1-7/8” (48 mm) from above measurement. This will allow for proper gapping and location of gate.
3. Identify top and bottom of panel.
   NOTE: The posts only fit in one direction.
4. Lay panel on a flat non-marring surface. Place posts on top of panel. Place posts so that width measurement from Step 2 is to the outside of each post.
5. Adjust posts so that cut marks do not fall on a baluster. Make sure distance from first baluster to post is the same on both sides. Mark cut locations on panel.
   NOTE: If widths do fall on a baluster, cut baluster flush at top and bottom prior to cutting panel.
6. Cut panel using a reciprocating saw (equipped with a metal blade).
7. Insert posts into panel.
   NOTE: Make sure top and bottom of panel orientation is correct.
8. Secure posts to panel with four #8-18 short self-tapping screws (provided) in each location.

9. Attach shorter side of hinge to the gate.

NOTE: Refer to instructions included in hardware package. Be sure to use correct fasteners for aluminum. See chart below.

10. Place gate in opening on blocks. Sweep between bottom of gate and top of deck cannot exceed 4” (102 mm) per IRC/IBC code regulations. Ensure bottom gate posts will be high enough to clear skirts on bottom of deck posts.

11. Make sure posts are plumb and gate is level. Attach longer side of hinges to post using appropriate hardware for type of post installed. Install hinge cover.

NOTES:
» Both wood and aluminum screws are included in hardware kit. (Refer to chart under Step 9.)
» If using Trex Post Mounts with Post Sleeves, pre-drilling is required using 1/8” (3 mm) drill bit, as you must go through both aluminum sleeve and internal post.

12. After determining location and height of hinge and hasp, install per instructions included with hardware kit.

13. Ensure proper operation of gate. Hinge tension is adjustable (check hardware kit instructions for more detail).

14. After gate installation, place blocks under gate for support. Use a rubber mallet to install cap onto gate post. Repeat for other gate post cap. Snap all hinge covers into place.

NOTE: Use of non-Trex hardware is not recommended and could result in serious injury or death.

TREX® SIGNATURE™ PANELS

NOTES:
» TREX® SIGNATURE™ RAILINGS ARE DESIGNED TO BE ATTACHED WITH POSTS INSTALLED AT A CLEAR SPAN OF 6’ (1.83 M) OR 8’ (2.44 M).
» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING POST-TO-POST CONFIGURATION, THE BOTTOM RAIL WILL NOT NEED TO BE CUT, BUT THE TOP RAIL WILL NEED TO BE MEASURED AND CUT.
» IF INSTALLING AT EXACT SPAN LENGTHS OF 6’ (1.83 M) OR 8’ (2.44 M), AND USING CROSSOVER POST CONFIGURATION (SPANS FROM ONE CROSSOVER POST TO ANOTHER CROSSOVER POST), BOTH THE BOTTOM RAIL AND TOP RAIL WILL NOT NEED TO BE CUT.
» IN ADDITION, AT ALL FINAL END POST CONFIGURATIONS, TOP RAIL WILL NEED TO BE MEASURED AND CUT.
» SEE INFORMATION WITHIN DETAILED INSTRUCTIONS FOR MORE INFORMATION.
» SEE PAGE 58 FOR SKU NUMBERS.

A. Trex® Signature™ upper rail cover*
- 6’ (actual length 73-1/2” [1867 mm])
- 8’ (actual length 97-1/2” [2477 mm])
B. Trex® Signature™ Panel (includes top and bottom railings and square balusters)
C. Crossover bracket cover (supplied with crossover post)
D. Trex® Signature™ crossover post**
- 36” (actual length 34-1/2” [876 mm])
- 42” (actual length 40-1/2” [1029 mm])
E. Trex® Signature™ foot block***
F. Trex® Signature™ post skirt or post sleeve skirt**
G. Trex® Signature™ post***
2-1/2”
- 36” (actual length 37” [940 mm])
- 42” (actual length 43” [1092 mm])
or Trex 4x4 post sleeve**
- 36” (actual length 39” [991 mm])
- 42” (actual length 45” [1143 mm])
H. Trex® Signature™ post cap or post sleeve cap**
I. Trex® Signature™ upper rail bracket and cover
J. Trex® Signature™ lower rail bracket and cover
K. Trex decking
L. Code-approved wood joist 2” x 8” (51 mm x 203 mm) or larger
M. Trex Fascia
N. Code-approved wood rim joist 2” x 8” (51 mm x 203 mm) or larger

* Covers are slightly longer to accommodate crossover post applications.
** Item not included in Trex® Signature™ Panel kits. Both 4” x 4” (102 mm x 102 mm) and 6” x 6” (152 mm x 152 mm) post sleeves are designed to fit over 4” x 4” pressure-treated post.
*** Required ONLY for all clear span applications over 6’ (1.83 m) when fixed baluster is centered or unsupported spans greater than 5’ (1.52 m). For example, if an 8’ (2.44 m) panel is cut into a 5-1/2’ (1.68 m) section, it would require a foot block due to the off-center placement of the fixed baluster.

NOTE: If installing 42” (1067 mm) railing, and using pressure-treated posts with Trex post sleeves, ensure that a longer pressure-treated post is used along with longer post sleeve, both cut to a height of 46” (1168 mm) from decking surface.
BRACKET HARDWARE – HORIZONTAL APPLICATIONS
(INCLUDING HORIZONTAL SWIVEL BRACKETS)
TREX® SIGNATURE™

HORIZONTAL RAILING HARDWARE

AA. Lower rail bracket
BB. Lower rail bracket cover
CC. Upper rail bracket cover

JJ. Horizontal swivel bracket bottom rail cover
KK. Horizontal swivel bracket bottom rail
LL. Swivel base cover

NOTE: For measurements and detailed horizontal swivel hardware installation instructions, please see the complete Trex® Signature™ installation section.
HOW TO INSTALL PANELS
TREX® SIGNATURE™

Attach Brackets Using Trex® Signature™ Posts
TIP: Use a clamp to help hold brackets in place while fastening with screws.

1. Measure 1-3/8” (35 mm) from top of post base plate or 1-7/8” (48 mm) from decking surface. Mark with light line.

2. Center lower bracket on post above the marked line and attach using two self-tapping screws (provided).

3. Measure up 32-5/8” (829 mm) for 36” (914 mm) tall railing or 38-5/8” (981 mm) for 42” (1067 mm) tall railing from top of lower rail bracket. Mark with a light line.

4. Center upper bracket on post below marked line and attach using (3) self-tapping screws (provided).

NOTE: Upper bracket is not required on crossover post configuration.

Attach Brackets Using Pressure-Treated Posts and Post Sleeves
TIP: Use a clamp to help hold brackets in place while fastening with screws.

5. Measure 1-7/8” (48 mm) up from deck surface to bottom of bracket. Slide skirt up to allow for proper measurement, then push skirt back down onto surface of decking BEFORE ATTACHING BRACKET. Mark with light line.

6. Center lower bracket on post above the marked line and attach using two 2” (51 mm) wood screws (provided).

7. Measure up 32-5/8” (829 mm) for 36” (914 mm) tall railing or 38-5/8” (981 mm) for 42” (1067 mm) tall railing from top of lower rail bracket. Mark with a light line.

8. Center upper bracket on post below marked line and attach using three 2” (51 mm) wood screws (provided).
How to Measure and Cut Bottom and Top Railings of Trex® Signature™ Panel (When REQUIRED)

1. Position panel between posts and align with bottom bracket. Align center baluster with middle of span between posts (this will allow for equal spacing between end balusters and each post). Mark bottom and top railing at each end.

**NOTE:** If the end balusters fall too close to the brackets, the center point can be adjusted one baluster to the left or right to allow more room.

**Cutting Bottom Rail**

2. Using a saw equipped with a non-ferrous metal blade, cut each end of bottom rail and bottom rail insert 1/4” (6 mm) shorter than mark on each end to allow for fit into bottom rail brackets.

**Cutting Top Rail**

Option 1: For Post-to-Post Configuration

3a. Using a saw equipped with a non-ferrous metal blade, cut each end of top rail 1/4” (6 mm) shorter than mark to allow for fit into top rail brackets.

**Cutting Top Rail**

Option 2: For Post-to-Crossover Post Configuration

3b. Top rail must be cut differently on each side of the rail. Railing side that attaches to standard post should be cut 1/4” (6 mm) shorter than the mark to allow for fit into top rail bracket. Railing side that attaches to the crossover post should be cut 3/4” (19 mm) LONGER than the mark to allow for fit into the crossover post bracket.
HOW TO INSTALL PANELS/CONTINUED
TREX® SIGNATURE™

Cutting Top Rail
Option 3:
For Crossover Post-to-Crossover Post Configuration

3c. Cut each end of top rail 3/4” (19 mm) LONGER than the mark to allow for fit into the crossover post bracket on each side.

4. Using razor knife or other cutting tool, cut rail insert 3/4” (19 mm) FROM EACH SIDE.

5. Mark and cut top rail cover same length as top rail for all top rail configurations.

Install Trex® Signature™ Panel

6. Break or cut the bottom tab off the bottom brackets.
7. Put a dab of silicone in the basket of the bottom bracket to prevent rattle.

8. Place panel in bottom and top brackets.

9. For post-to-post configuration, fasten upper rail to each bracket by installing screws diagonally through upper rail into bracket using two self-tapping screws each side (provided with bracket kit).
10. For crossover post configuration, fasten upper rail to crossover post by installing screws diagonally through upper rail into post using two self-tapping screws each side (provided with bracket kit).

NOTE: Pre-drilling is recommended (7/64” [2.8 mm] drill bit) for attachment of railing to bracket.
11. Attach upper rail cover to upper rail by aligning cover on one side of rail. Then, starting from one end of rail, snap cover onto opposing slot working down length of rail. GENTLE tapping with a rubber mallet may facilitate fastening.

Attachment of Bracket Covers, Skirts, and Caps

12. Attach corresponding bracket covers over opening in upper and bottom rails.
13. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

14. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).
15. Attach post caps to post sleeves using external grade PVC construction adhesive.
16. For crossover post configuration, attach crossover post cap to crossover post.
HOW TO INSTALL FOOT BLOCKS – PANELS
TREX® SIGNATURE™

Attachment of Foot Block (Required ONLY for All Clear Span Applications Over 6’ [1.83 m])

1. To ensure correct location, place foot block under center of bottom rail. Mark to provide placement location of base.
2. Place base (smaller side facing down) on decking surface. Attach base of foot block using one screw at an angle through base and into decking.

3. After attached, use a rubber mallet along with scrap piece of wood to tap foot block until it locks into place.

NOTE: Pre-drilling is recommended (1/8” [3 mm] drill bit) for attachment of base.
TREX SELECT RAILING

NOTES:

» All Trex Select Railing lengths are manufactured at ON CENTER dimensions (spanning from center of each post): 67-5/8" (176.8 cm) for 6' (1.83 m) on center, and 92-5/8" (235.3 cm) for 8' (2.44 m) on center. Note that railings are designed to be slightly longer that required to allow for very slight play in post placement – trimming may be required. IT IS VERY IMPORTANT TO MEASURE FIRST.

» SEE PAGE 58 FOR SKU NUMBERS.

PARTS

A. Select top rail
B. Select bottom rail
C. Brackets
D. Balusters
E. Adjustable foot block
F. Post sleeve cap*
G. Post sleeve skirt*
H. Post sleeve – 4" x 4" (102 mm x 102 mm) or 6" x 6" (152 mm x 152 mm) post sleeve)**
I. Trex decking
J. Trex fascia
K. Code-approved wood joist – 2" x 8" (51 mm x 203 mm)
L. Code-approved wood rim joist – 2" x 8" (51 mm x 203 mm) or larger

* Item not included in the Select railing kits.
** Both 4" x 4" (102 mm x 102 mm) and 6" x 6" (152 mm x 152 mm) post sleeves are designed to fit over 4x4 pressure-treated post.

NOTE: If installing 42" (1067 mm) railing, use longer posts sleeves and measure accordingly to ensure a proper cut (DO NOT CUT POST SLEEVES TO ACTUAL 42" – THESE NEED TO BE LONGER TO ALLOW FOR POST CAPS TO FIT).

NOTE: Pictorial representations shown may only show one style of railing, while others may also be used. Review detailed instructions to determine what railing styles and combinations can be used.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
**TREX SELECT RAILING**  
**RAILING CONFIGURATIONS**

**Standard**

Cutting post sleeves is **NOT** required.
A. Pressure-treated post or Trex post mounts* with Trex Transcend post sleeves, or Trex joist mount posts*
B. Select top rail
C. Select bottom rail
D. Select balusters

*See page 117 for “How to Install Standard Railing”.

**Cocktail**

Post sleeves **WILL NEED TO BE CUT.**
A. Pressure-treated post with Trex Transcend post sleeve  
   **NOTE:** » Only for use with 4” x 4” (102 mm x 102 mm) post sleeve.  
   » Trex post mounts or joist mount posts cannot be Select cocktail design.
B. Deck board top rail.  
   **NOTES:** » Contour and Escapes cannot be used  
   » Deck boards will need to be cut to fit each rail span
C. Select top rail
D. Select bottom rail
E. Select balusters

*See page 119 for “How to Install Select Cocktail Railing”.

**Traditional**

Cutting post sleeves is **NOT** required.
A. Pressure-treated post or Trex post mounts* with Trex Transcend post sleeves, or Trex joist mount posts*
B. 2” x 4” (51 mm x 102 mm) lateral top rail
C. Select top rail
D. Select bottom rail
E. Select balusters

*See specific installation instructions for attachment of Trex post mounts or Trex Joist Mount Posts prior to installing any railing.

*See specific installation instructions for attachment of Trex post mounts or Trex Joist Mount Posts prior to installing any railing.

**HOW TO INSTALL TREX SELECT STANDARD RAILING**  
**TREX SELECT**

Read all instructions BEFORE installation.

**Important:** Post sleeves are **NOT** to be cut for this design style.
Installing Pressure-Treated Posts

> Select Railing Kits are designed for posts to be installed at maximum of 6’ or 8’ (1.83 m or 2.44 m) ON CENTER depending on the length being used. (NOTE: Smaller spans are allowed).
>
> Attach posts using 1/2” (13 mm) carriage bolts.
>
> Minimum joist size is 2” x 8” (51 mm x 203 mm).
>
> Top bolts must be 1” (25 mm) from tops of joists.
>
> Bottom bolts must be 5-1/8” (130 mm) from top bolts.

**NOTE:** Blocking MUST be added for extra strength.

Installing Post Sleeve Skirts and Post Sleeves

2. Slide post sleeve skirt over post and down to rest on decking surface. Slide post sleeve over post and position inside post sleeve skirt.

**NOTE:** Shims can be used to plumb post sleeves.

Cutting Railings

3a. Position bottom and top rails between posts, ensuring baluster holes are lined up and spaced evenly.

3b. Also allow for a minimum of 1-9/16” (40 mm) on each end of rail for bracket placement AND baluster clearance. Mark rails at intersection of rail and post.

**IMPORTANT NOTE REGARDING FOOT BLOCK INSTALLATION:**

> Determine which style of foot block is included. Original foot block is a one-piece part that is adjustable. New foot block is a two-piece part with turning base mount.
>
> Also refer to detailed instructions (Trex Select® rail instructions) included with foot block prior to installation of railing section as these include other required steps for proper installation.

If Attaching Original Foot Block to Bottom Rail

4a. Invert the bottom railing. Center foot block on the bottom rail and attach per Original Foot Block instructions.

If Attaching New Foot Block to Bottom Rail

4b. Invert the bottom rail. Center and drill a hole using a 3/16” (5 mm) drill bit. This will be location for foot block attachment (to be installed last).
Attaching Brackets to Rails

5a. Position brackets on each end of TOP RAIL on the same side as baluster holes. Attach brackets using three #8-18 x 1” self-drilling screws (provided).

5b. Position brackets on each end of BOTTOM RAIL on the OPPOSITE SIDE of the baluster holes. Attach brackets using three #8-18 x 1” self-drilling screws (provided).

Assembling Railing Section

6a. On a clean flat surface, lay bottom railing on its side. Make sure to allow enough room for installation of balusters and top rail. Place a scrap piece of 1” (25 mm) decking board running parallel to bottom rail for support when installing balusters.

6b. Insert balusters into bottom rail slots until balusters are fully seated.

6c. Attach top rail to balusters, feeding each baluster into required slots. Start on one end and work towards the other.

6d. To help temporarily secure the railing section together, place a ratchet strap around the top and bottom rail and tighten until snug. DO NOT OVERTIGHTEN AS YOU CAN BEND THE RAILING.

Installing Railing Section to Posts

7a. Using scrap material (i.e. 2 x 4s, decking boards, etc.) cut at least three support blocks at 3-3/4” (95 mm) in height. Place one each on decking surface beside each post and one near center of span.

7b. Lift secured railing section up, and CENTER this section in between the spanned posts on pre-positioned support blocks.

NOTE: To help stabilize railing section use a quick-grip clamp (or other type of clamp) and clamp the first baluster to post sleeve. (DO NOT OVERTIGHTEN CLAMP.)

7c. Install both bottom and top brackets on each side to post using two #8-10 x 2” wood screws (provided). For best results, set drill to low speed when installing these screws.
HOW TO INSTALL TREX SELECT RAILING/CONTINUED

TREX SELECT

Attaching Post Caps and Installing New Foot Block
8. Secure post caps with silicone or PVC adhesive. Attach new foot block per foot block instructions.

NOTE: Clean up any excess adhesive before drying.

HOW TO INSTALL COCKTAIL RAILING
TREX SELECT

4. Cutting Railings
   See instructions on page 126.

5. Attaching Foot Block to Bottom Railing
   See instructions on page 126.

NOTES:
» If installing in weather below 40°F (4.5°C), leave 1/8” (3 mm) gap between deck boards.
» Deck boards can overhang end of last post maximum 1/2” (13 mm).

Cutting Deck Board
6. Cut deck boards to appropriate length of railing span, remembering to include extra space on each side of the deck board to allow for attachment to the post. Decking boards must cover 1/2 of the pressure-treated post to allow this to be fastened later.

Important: ONLY use for use with pressure-treated 4x4 post (3.5” nominal square) and 4” x 4” (102 mm x 102 mm) post sleeve. Trex Post Mounts or Joist Mount Posts cannot be used with Select Cocktail railing.

1. Installing Pressure-Treated Posts, Post Sleeve Skirts and Post Sleeves
   See instructions on page 126.

Cutting Post and Post Sleeve
1a. Mark and cut post and post sleeve measuring from deck surface:
   » 36-1/8” (918 mm) for 36” (914 mm) height.
   » 42-1/8” (1070 mm) for 42” (1067 mm) height.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX SELECT RAILING/CONTINUED

TREX SELECT

7. Place inverted deck board (place top side of deck board down) on clean, flat surface. (DO NOT use Escapes or Contour deck boards for top rail.)

8. Place inverted Select top rail (orient properly so baluster holes are shown top side up), on the deck board, centered in both directions to allow final attachment to post.

9. Secure deck board to Select top rail with 3/4” screws provided approx. every 16” on center. Screws are to be installed inside of the baluster holes into the decking board. DO NOT overtighten.

NOTE: A long drill bit will be required to fit inside the baluster holes.

10. Assembling Railing Sections
See instructions on page 127.

11. Installing Railing Sections to Posts
See instructions on page 127.

12. Attaching Deck Board to Posts
Attach boards on each post with Trex recommended composite screws (quantity of 2 per each board end).

HOW TO INSTALL TREX TRADITIONAL RAILING

TREX SELECT

1. Installing Pressure-Treated Posts, Post Sleeve Skirts and Post Sleeves
See instructions on page 126.

2. Attaching Foot Block to Bottom Railing
See instructions on page 126.

3. Cutting Railings
See instructions on page 116.

Cutting 2” x 4”

4. Cut 2” x 4” (51 mm x 102 mm) to same length of the inverted Select top rail.
HOW TO INSTALL TREX SELECT RAILING/CONTINUED
TREX SELECT

Attaching 2” x 4” to Select Top Rail

5. Place inverted 2” x 4” (51 mm x 102 mm) (place topside down) on clean, flat surface.
6. Place inverted Select top (orient properly so baluster holes are shown top side up) on 2” x 4” (51 mm x 102 mm).
7. Secure 2” x 4” (51 mm x 102 mm) to Select top rail with 3/4” screw provided approx. every 16” on center. Screws are to be installed inside of the baluster holes into the decking board. **DO NOT** overtighten. Note that a long drill bit will be required to fit inside the baluster holes.

8. Assembling Railing Sections
   See instructions on page 127.
9. Installing Railing Sections to Posts
   See instructions on page 127.
10. Attaching 2x4 to Posts
    Pre-drill a pilot hole and toenail 2-1/2” (64 mm) screw at each end of 2” x 4” (51 mm x 102 mm) into post on back side of rail (side not facing decking).
11. Attaching Post Caps and Installing New Foot Block
    See instructions on page 128.

HOW TO INSTALL ON-AN-ANGLE RAILING
TREX SELECT

**NOTE:** Brackets are designed to be installed up to a 45° angle.

Both 4” x 4” (102 mm x 102 mm) or 6” x 6” (152 mm x 152 mm) post sleeves work well for angles up to 45 degrees. Bottom rail brackets may need to be slightly offset to one side in order to fit properly to hold rail in place. Before attaching bracket to rail, measure and mark to ensure bottom rail remains parallel to upper rail.
HOW TO INSTALL TREX SELECT STAIR RAILING
TREX SELECT

Read all instructions BEFORE installation.
IMPORTANT NOTE: POST TO POST SPAN WILL BE LESS THAN 6’. PRIOR TO INSTALLING POSTS, CALCULATE POST TO POST SPAN USING A MAXIMUM RAIL LENGTH OF 6’ AND THE ANGLE (32°-37°) AT WHICH THE RAILS WILL BE INSTALLED. DO NOT INSTALL STAIR POSTS AT 6’ SPAN, AS STAIR RAILINGS WILL THEN BE TOO SHORT.

NOTE: All Select railings work ONLY WITH STAIR SLOPES OF 32° TO 37°.

Installing Posts, Post Sleeve Skirts, and Post Sleeves for Stair Rails
1. Install posts, post sleeve skirts, and post sleeves according to standard Select railing instructions.
   » In most cases, a post and post sleeve longer than 39” (991 mm) will be needed on the lower section of stair rail to accommodate stair angle.
   » Make sure top and bottom posts for stars are installed at nose of each tread.

Measuring and Cutting Railings
2. Set railing along the nose of the stair treads, making sure baluster holes are vertically aligned and mark line at each intersection. When measuring, cut equal lengths from each side of railing allowing a minimum of 2” (51 mm) on each end from the last baluster hole to the end of the rail. This will ensure proper baluster and bracket placement and equal spacing of balusters per each railing section.

Cutting Balusters on Angle (OPTIONAL)
3a. In order for balusters to seat properly (depending on the angle of the stair railing), the balusters may need to be trimmed to match the angle of the bottom and top railing.

3b. Set bottom railing on nose of stair treads and set baluster at 90° on the outside of the railing. Mark and measure the angle.

NOTE: Measure, mark, and cut a scrap board to ensure you have proper angle BEFORE cutting balusters on angle.

3c. Cut the VERY END of baluster, both top and bottom, making sure that point to point measurement of the baluster remains at either 32” (813 mm) for 36” (914 mm) rail heights or 38” (965 mm) for 42” (1067 mm) rail heights.

IMPORTANT NOTE REGARDING FOOT BLOCK INSTALLATION:
» Determine which style of foot block is included.
   Original foot block is a one-piece part that is adjustable. New foot block is a two-piece part with turning base mount.
   » Also refer to detailed instructions (Trex Select rail instructions) included with foot block prior to installation of railing section as these include other required steps for proper installation.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX SELECT STAIR RAILING/CONTINUED

TREX SELECT

If Attaching Original Foot Block to Bottom Rail

4a. For stair applications, cut the section of foot block at an angle to match rail. Refer to foot block instructions for specific information on how to do this.

4b. Invert bottom rail. Center foot block on bottom rail and attach at marked position per Original foot block instructions. DO NOT extend foot block.

If Attaching New Foot Block to Bottom Stair Rail

4c. Invert the bottom stair rail. Center and drill a hole using a 3/16" (5 mm) drill bit. This will be location for foot block (to be installed last).

Attachment of Brackets to Railings

5a. Check fit for both top and bottom railings in designated positions for location onto posts. Remove railings.

Upper Stair Post Locations

5c. On the TOP RAIL, attach the assembled top stair bracket to the side with baluster holes. On the BOTTOM RAIL, attach the assembled top stair bracket to the OPPOSITE SIDE of the baluster holes. Attach both brackets using three #8-18 x 1" self-drilling screws (provided).

5b. Snap the top stair adaptor bracket (labeled TOP) to the standard bracket. Repeat for remaining bracket.

5d. Snap the bottom stair adaptor bracket (labeled BOTTOM) to the standard bracket. Repeat for remaining bracket.

5e. On the TOP RAIL, attach the assembled bottom stair bracket to the side with baluster holes. On the BOTTOM RAIL, attach the assembled bottom stair bracket to the OPPOSITE SIDE of the baluster holes. Attach both brackets using three #8-18 x 1" self-drilling screws (provided).

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
Attachment of Bottom Rail to Post

6a. Assemble a few of the balusters into the bottom and top railings (make sure balusters are setting at 90°) and set this on scrap material clearing the stair treads to determine where bracket locations need to be. Measure to make sure that the bottom railing will clear the stair treads and the top railing will be aligned with horizontal railing (remember in most cases, a longer post and post sleeve will be needed on the lower section of stair rail to accommodate stair angle).

6b. After locating appropriate position for bottom rail remove top rail and balusters and attach bottom rail stair bracket to upper post using two #8-10 x 3” wood screws (provided).

6c. Attach bottom stair rail stair bracket to lower post using two #8-10 x 3” wood screws (provided). For best results set drill to low speed when installing these screws.

Install Balusters

7. Slide balusters into bottom rail until balusters are fully seated.

Attachment of Top Rail to Post

8a. Place top rail onto balusters, allowing the top rail to rest on the surface of the balusters.

8b. Attach top stair rail bracket to upper post using two #8-10 x 3” screws (provided). For best results set drill to low speed when installing these screws.

8c. Attach top stair rail bracket to lower post using two #8-10 x 3” screws (provided). For best results set drill to low speed when installing these screws.

Attaching Post Caps and Installing New Foot Block

9. Secure post caps with silicone or PVC adhesive. Attach new foot block per foot block instructions.

NOTE: Clean up any excess adhesive before it dries.
TREX ALUMINUM ADA COMPLIANT HANDRAIL

ADA Handrail Guidelines

1. ADA handrails can be installed using various design applications such as those for stairs, ramps, and horizontal applications. Designs include options for straight and 90° wall returns, 90° corners, and adjustable angles. Choose which is best for your needs before installing. Refer to railing profiles (page 58) for a more detailed parts list.

2. The handrail system top rail should be 34" (864 mm) to 38" (965 mm) above the surface. However, verifying height requirements with local building code officials before installing is important as codes vary in different areas.*

3. Maintain a minimum clearance of 1-1/2" (38 mm) between the handrail and any obstructions above or behind the handrail.

4. The end loop return at all landings must extend 12" (305 mm) past the end of the ramp or stair application.*

5. The slope of the handrail for the ramp should not exceed 1" (25 mm) rise over a 12" (305 mm) run.

6. The maximum recommended span between supports is 6’ (1.83 m) on center. Thus, placement of posts is critical when installation of railing is being considered.*

7. Rails are designed to have a tight fit into other connecting components. It is critical to line these up in the correct orientation BEFORE connecting parts together. If it is necessary to shift or move a component on a rail, wrap with a protective cloth to prevent scratching as you may need to use a wide-mouth wrench to correct this.

8. At any straight location where internal connector is used, it is CRITICAL to locate these as close to a wall mount as possible.

9. If using metal posts, pre-drill all locations for bracket attachment. (ALWAYS use a drill bit slightly SMALLER in diameter than the screw being used for attachment.)

10. All elbow components can be cut down to allow for tighter angles. Cut a maximum of 2" (51 mm) on each side if this is required.

*Refer to the American Disabilities Act for detailed information in regards to handrail requirements.

SAFETY NOTES

» When cutting metal, ALWAYS wear proper safety eyewear (as well as any other proper safety wear).
» Remove all burrs from cut ends before installation.
» Use of a non-ferrous metal blade is recommended.

**NOTE:** If attaching brackets to 6x6 posts/post sleeves, use 8-10 x 2-1/2” (64 mm) wood screws (not included).

*Can only be used with metal post horizontal applications.

**NOTE:** Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX ALUMINUM ADA COMPLIANT HANDRAIL

90° Wall Return

1. If required, cut railing to proper length based on location of wall return(s) or attachment to other components.
2. If desired, collar ring can be used to hide seam of wall return to rail. Slide this over rail BEFORE inserting rail into wall return.
3. Slide rail onto wall return until it is fully inserted and seam is hidden under collar (if collar is being used).
4. Attach wall return to post using specific hardware provided (see chart on previous page), ENSURING wall return is at proper angle of alignment to post. (Wall return is designed to have tight fit into rail, thus location of attachment is critical.) If using metal posts, pre-drill post prior to attachment of wall mount.

Rail-to-Rail Connections/Internal Connector

NOTE: When rail-to-rail straight connections are use for longer spans, posts must be installed 6’ OC max. In addition, a wall mount MUST be used at each seam of rail-to-rail connections as close to center of wall mount as possible. If collar is used, this can be offset slightly to allow for the collar to fit.

1. If required, cut railing to proper length.
2. If desired, collar ring can be used to hide seam between rails. Slide this over rail BEFORE inserting rails into internal connector.
3. Slide internal connector into rail end until metal spacer screw is touching either end of rail or the collar, if this was used.
4. Slide second rail over opposite end of internal connector, until this is touching metal spacer screw.
5. Remove metal spacer screw using #2 square-head screwdriver.
6. Push second rail further over internal connector until this fits in the collar (if used) or fits tightly against rail.
7. Attach wall mount to post per previous instructions.
8. Attach rail to wall mount per previous instructions.
9. Use end caps where required.

Wall Mount

NOTE: Refer to Rail-to-Rail Connections section if connecting two or more rails together to make continuous straight run.

1. If required, cut railing to proper length based on location of wall mount(s) or attachment to other components.
2. Attach wall mount to post using specific hardware provided (see chart on previous page), ENSURING wall mount is at proper angle of alignment to angle of rail. If using metal posts, pre-drill post prior to attachment of wall mount.

TIP: To help with angled attachment, place one screw into bottom hole of bracket and pivot wall mount to position required.

NOTE: Construction methods are always improving. Please refer to www.trex.com for the most up-to-date installation requirements.
HOW TO INSTALL TREX ALUMINUM ADA COMPLIANT HANDRAIL

Elbows (90°, 36°, 34°, 31°, 5°)

1. If required, cut railing to proper length based on location of elbows and other components being used.
2. If desired, collar ring can be used to hide seam of elbow to rail. Slide this over rail **BEFORE** inserting rail into elbow.
3. Slide internal connector into rail end until metal spacer screw is touching either end of rail or the collar, if this was used.
4. Slide appropriate angled elbow onto opposite end of internal connector, until this is touching metal spacer screw.
5. Remove metal spacer screw using #2 square head screwdriver.
6. Push elbow further over internal connector until this fits in the collar (if used) or fits tightly against rail.
7. Attach wall mount to post per previous instructions.
8. Attach rail to wall mount per previous instructions.

Handrail Return 180°

**NOTE:** Ramp application shown here. (Appropriate angle elbow also required for stair applications.)

1. If required, cut railing to proper length based on location of elbow used as well and other components being used.
2. If desired, collar ring can be used to hide seam of handrail return to rail or elbow being used. Slide this over rail **BEFORE** inserting rail into other component.
3. Ensure that all components are aligned to both wall mount on post as well as location of elbow on rail **BEFORE** attachment.
4. Slide internal connector into appropriate elbow being until metal spacer screw is touching either end of elbow or the collar, if this was used.
5. Attach wall return to lower end of handrail return (longer side), **ENSURING** wall return is at proper angle of alignment to post. (Wall return is designed to have tight fit into rail, thus location of attachment is critical.)
6. Slide opposite end of handrail return onto internal connector, until this is touching metal spacer screw.
7. Remove metal spacer screw using #2 square head screwdriver.
8. Push handrail return further over internal connector until this fits in the collar (if used) or fits tightly against elbow.
9. Attach wall return to post per previous instructions.
10. Attach rail to wall mount per previous instructions.

Corner Mount

1. Corner mount can ONLY BE USED ON METAL POSTS and only for horizontal applications, such as stair landings.
2. Pre-drill metal post and install corner post to metal post using specific hardware provided (**see chart on previous page**).
3. If desired, collar ring can be used to hide seam of elbow to rail. Slide this over rail **BEFORE** inserting rail into elbow (**not shown in picture above**).
4. Slide internal connector into rail end until metal spacer screw is touching either end of rail or the collar, if this was used.
5. Slide appropriate angled elbow onto opposite end of internal connector, until this is touching metal spacer screw.
6. Remove metal spacer screw using #2 square-head screwdriver.
7. Push elbow further over internal connector until this fits in the collar (if used) or fits tightly against rail.
8. Install elbow to corner mount using specific hardware provided (**see chart on page 135**).
