

MIX-AND-MATCH RAILING COMPONENTS & KITS

Trex Transcend® railing is a wood thermoplastic composite railing lineal with an integrated shell (made from either acrylic or PVC) that covers all exposed surfaces. The thermoplastic core is different from that used in Trex® decking products, and has a unique set of properties designed to fit the guardrail application. The integrated shell utilizes PVC (for Classic White and Gravel Path colors) and acrylic (all other colors) to provide a long-lasting natural aesthetic. An alternative to both metal and wood guardrails, Trex composite railing products are a minimum of 40% recycled content of wood fiber and recycled polymeric content by weight.
