BUILD YOUR DECK
in FIVE EASY STEPS
BUILT FOR LIVING

Engineering what’s next in outdoor living® isn’t just a motto; it’s our mission. More than 20 years ago, Trex revolutionized the industry by introducing a high-performance, eco-friendly alternative to wood decking. Today, we’re proud to offer more ways than ever to live outdoors—whether you’re building on a budget or seeing your biggest, boldest idea through. It’s never been easier to make the Trex® decision that’s right for you.
YOUR DECKING CHECKLIST

In just five steps, go from having a bad case of deck envy to being 100% deck ready.

1. DETERMINE MATERIALS, SIZE & SHAPE
   The what and the how of building the deck of your dreams. Plan accordingly.

2. CONSIDER THE SUBSTRUCTURE
   Find out why our steel framing system results in long-lasting stability and support.

3. CHOOSE YOUR DECKING
   Explore a comprehensive range of easy, low-maintenance options.

4. CHOOSE YOUR RAILING
   The signifier of great taste. Pick a pre-styled combo or mix and match railing components for a custom look.

5. ADD THE EXTRAS
   Complete your outdoor area with furniture, lighting, kitchens and shade.
Once you know how you want to use your deck, you’ll be able to determine the best materials, size and shape. Ask yourself these questions to see where you stand.

1. Do you have the time to maintain a wood deck?
2. Will you use an existing substructure or build a new one?
3. Do you expect your deck to retain its vibrancy, year after year?
4. Do you envision a curved or angular deck?
5. Will there be more than one level?
6. Will there be multiple exits and entrances?
7. Do you want room for a grill or dining area?
8. How will you light your deck?
You could build your deck with any number of materials. But why would you, when Trex® decking and railing consistently outdeck wood and the wannabes?

STEP 2
Consider the SUBSTRUCTURE

Trex Elevations® is our alternative to splitting, warping and shifting wood substructures. This system of beams, joists and tracks fortifies the structure down below, resulting in an even surface above.

STRONGER
Triple-coated steel offers consistency, durability and reliability that treated wood can’t.

SMAIER
Precision engineering ensures surfaces remain flat over time.

SAFER
Rot- and termite-proof steel is chemical-free and outlasts wood.

SMARTER
Contains a minimum of 25% recycled steel and is a 100% renewable resource.

STEP 3
CHOOSE your DECKING

Vibrant shades of possibility give you unmatched control over the design of your deck. Turn the page to find the Trex® decking color and collection that best suit your home—and your budget.
