HOW TO INSTALL STAIR POSTS AND STAIR RAILING
TREX® SIGNATURE™

IMPORTANT NOTES:
» TREX® SIGNATURE™ POSTS CANNOT BE USED WITH TREX® SIGNATURE™ TRADITIONAL OR TREX® SIGNATURE™ COCKTAIL STAIR DESIGNS, ONLY PRESSURE-TREATED POST/POST SLEEVES CAN BE USED. REFER TO DETAILED INSTRUCTIONS FOR MORE INFORMATION.
» All Trex® Signature™ stair installations require the use of 53” (134.6 CM) stair post, measured and cut to appropriate length if required.
» If crossover stair post is required, use stair post (again cut to appropriate length if required) and use swivel crossover bracket.
» Trex® Signature™ Stair fixed brackets are designed to work only with stair slopes of 32°-37°.
» For smaller (less than 32°) or larger angles (greater than 37°), use the Trex® Signature™ Stair Swivel brackets.
» Trex® Signature™ Compound swivel stair brackets are designed for flared stair designs.
» If installing stair railings at exact span lengths of 6’ (1.8 M) or 8’ (2.4 M) and using post-to-post configuration, the bottom stair rail will not need to be cut*, but the top stair rail will need to be measured (making sure balusters line up vertically) and cut.
» If installing stair railings at exact span lengths of 6’ (1.8 M) or 8’ (2.4 M), and using crossover post configuration (spans from one crossover post to another crossover post), both the bottom and top stair rails will not need to be cut* if the angle is approximately 34°.
» At all final end post configurations, top stair rail will need to be measured (making sure balusters line up vertically) and cut.
» For odd span lengths, both bottom and top stair rails will need to be measured (making sure balusters line up vertically) and cut. Also, ensure that balusters are spaced with equal distance on each side of the post.
» Rails that do not require cutting must be oriented in the correct direction to ensure balusters are spaced properly when installed in brackets. On both bottom and top stair railings, baluster hole closest to the end of the each stair rail is to be installed at the top of the stair section. Ensure that both bottom and top rails are correct and balusters line up vertically before INSTALLING.

Installing Standard Trex® Signature™ Stair Posts, Trex® Signature™ Stair Crossover Posts, or Pressure-treated Post, Post Sleeves and Skirts

1. Make sure 53” (135.6 cm) posts are used for all stair posts.

2. If Trex® Signature™ stair posts are used, install at nose of stair tread directly under required blocking. See Trex® Signature™ horizontal post instructions on pages 76–78 for details.

3. If pressure-treated post/post sleeves are used, posts are to be installed to the inside of the last stair stringer (rails must be over decking surface). See instructions for Trex® Signature™ Posts for more information.
ATTACHING FIXED STAIR BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES
TREX® SIGNATURE™

NOTES:
» All Trex® Signature™ fixed stair brackets work ONLY with stair slopes of 32°-37°.
» Illustrations shown are representations when using Trex® Signature™ post, but same rules apply if using pressure-treated posts and post sleeves.
» Use a clamp to help hold stair brackets in place while fastening with screws.

IMPORTANT NOTE:
» BEFORE ATTACHING ANY UPPER BRACKETS MAKE SURE PROPER RAILING HEIGHTS ARE ACHIEVED. RAILING HEIGHTS AND UPPER BRACKET HEIGHTS MAY NEED TO BE ADJUSTED, HOWEVER, DO NOT REDUCE HEIGHTS BASED ON YOUR RAILING CODE REQUIREMENTS. MEASURE CAREFULLY AS DIMENSION HEIGHTS MAY NEED TO BE ADJUSTED!

1. Lay bottom stair rail on steps beside posts. Position bottom rail at least 1” (2.5 cm) above nose of stair tread.

Tip: Use a 1” (2.5 cm) deck board as a spacer board and clamp rails to post. Mark where lower brackets are to be attached to both posts. Mark at underside of railing location.

Installing Lower Fixed Stair Brackets

2. Center lower stair bracket on post above the marked line and attach using two self-tapping screws (provided). In some cases it may be difficult to attach the stair bracket on the lower stair post. A 90° cordless drill is recommended to attach screws in this area (if possible).

3. Position bottom stair rail along the nose of the stair treads. Ensure that before cutting, balusters holes are centered in between the posts and also allow for clearance for attachment to brackets. On top stair post location, mark UNDERSIDE of lower rail. On bottom stair post location mark TOPSIDE of lower rail at angled intersection of the bracket.

4. Cut each end of the bottom stair rail, rail insert, and bottom rail cover 1/4” (0.6 cm) shorter than the mark on each end to allow for fit into bottom stair rail brackets.

NOTE: Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.
ATTACHING FIXED STAIR BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

5. Attach “flat” bottom stair rail cover to bottom stair rail. Align cover on one side of the bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of the rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

6. Set bottom stair rail into bottom stair rail brackets. Attach bottom stair rail to bottom stair bracket using two self-tapping screws (provided) on each side of bracket.

8. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and ENSURE that balusters are parallel with post.

9. Mark a light line on posts at UNDERSIDE of rail to show the location of the fixed stair brackets.

10. Remove upper stair rail and center upper stair fixed bracket on post above the marked line and attach using two self-tapping screws (provided).

NOTE: Construction methods are always improving. Please ensure you have the most up-to-date installation instructions by visiting: trex.com
ATTACHING FIXED STAIR BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED
TREX® SIGNATURE™

11. On top stair post location, mark **UNDERSIDE** of upper rail. On bottom stair post location mark **TOPSIDE** of upper rail at angled intersection inside the bracket.

**Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover**

12. Cut each end of top stair rail along with rail insert 1/4” (0.6 cm) shorter than mark to allow for fit into top stair rail bracket.

**NOTE:** Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.

13. Mark and cut top rail cover same length as top rail for all top rail configurations.

14. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. GENTLE tapping with a rubber mallet may facilitate the fastening.

**Installing Balusters into Bottom Stair Rail**

15. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.
ATTACHING FIXED STAIR BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

**Attaching Upper Stair Rails**

16. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

17. Attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

*NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of stair railing to stair bracket.*

18. Attach corresponding bracket covers over opening in upper and bottom rails.

19. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

20. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).

**Attachment of Stair Bracket Covers, Skirts, and Caps**

ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES
TREX® SIGNATURE™

NOTES:
» Illustrations shown are representations when using Trex® Signature™ posts, but same rules apply if using pressure-treated posts and post sleeves.
» Use a clamp to help hold stair brackets in place while fastening with screws.

IMPORTANT NOTE:
» BEFORE ATTACHING ANY UPPER BRACKETS, MAKE SURE PROPER RAILING HEIGHTS ARE ACHIEVED. RAILING HEIGHTS AND UPPER BRACKET HEIGHTS MAY NEED TO BE ADJUSTED, HOWEVER, DO NOT REDUCE HEIGHTS BASED ON YOUR RAILING CODE REQUIREMENTS. MEASURE CAREFULLY AS DIMENSION HEIGHTS MAY NEED TO BE ADJUSTED!

1. Lay bottom stair rail on steps beside posts. Position bottom rail at least 1” (2.5 cm) above nose of stair tread.

Tip: Use a 1” (2.5 cm) deck board as a spacer board and clamp rails to post. Mark where lower brackets are to be attached to both posts. Mark at underside of railing location.

Installing Lower Stair Swivel and Compound Swivel Brackets

2. Center lower stair swivel bracket on post above the marked line and attach using four self-tapping screws (provided). In some cases it may be difficult to attach the stair bracket on the lower stair post. A 90° cordless drill is recommended to attach screws in this area (if possible).

How to Measure Bottom Stair Railings (WHEN REQUIRED)

3. With brackets in correct swivel locations, measure distance from inside of swivel bracket to inside of swivel bracket. Ensure that before cutting, balusters holes are parallel and centered in between the posts and also allow for clearance for attachment to brackets. Mark bottom stair rail at each intersection.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover, and Attachment of Bottom Stair Rail Cover

4. Cut each end of the bottom rail, rail insert, and bottom rail cover at the mark on each end to allow for fit into bottom stair rail brackets.

NOTE: Railing does not need to be cut at angle. Brackets are designed to allow for railing to be installed with standard straight cut.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

5. Attach “flat” bottom stair rail cover to bottom stair rail. Align cover on one side of the bottom rail in slot on side of rail. Then starting from one end of rail snap cover onto opposing slot working down the length of the rail. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

6. Set bottom stair rail into bottom stair rail brackets. Attach bottom stair rail to bottom stair bracket using two self-tapping screws (provided) on each side of bracket.

7. Place two balusters into lower rail at each end closest to post.

8. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and ENSURE that balusters are parallel with post.

9. Clamp brackets to side of rail with brackets in correct swivel location/angle (this is important to ensure correct location of swivel brackets).

10. Mark a light line on posts at UNDERSIDE of where swivel bases (positioned correctly) meets the posts.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

11. Remove upper stair rail from balusters and center upper stair swivel bracket on post above the marked line and attach using four self-tapping screws (provided).

12. Cut top rail along with rail insert to the measurement between the top stair swivel brackets. For standard post to standard post configurations this would be same dimensions as that of the bottom stair rail.

13. Mark and cut top rail cover same length as top rail for all top rail configurations.

14. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. GENTLE tapping with a rubber mallet may facilitate fastening.

Installing Balusters into Bottom Stair Rail

15. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

Attaching Upper Stair Rails

16. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

17. Attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of stair railing to stair bracket.
ATTACHING STAIR SWIVEL/COMPOUND SWIVEL BRACKETS AND RAILS TO POSTS AND PRESSURE-TREATED POST AND POST SLEEVES/CONTINUED

TREX® SIGNATURE™

ATTACHING CROSSOVER SWIVEL BRACKETS ON SIGNATURE POSTS
TREX® SIGNATURE™

1. Follow previous instructions for installation of lower stair rail into either fixed or swivel brackets.
2. Place two balusters into lower stair rail at each end of post.
3. Position top stair rail onto balusters ensuring balusters are fully seated in top rail (position to side of post) and ENSURE that balusters are parallel with post.
4. Follow previous instructions marking and installation of either fixed or swivel bracket where this is required.

ATTACHING CROSSOVER SWIVEL BRACKETS ON SIGNATURE POSTS
TREX® SIGNATURE™

18. Attach corresponding bracket covers over opening in upper and bottom rails.
19. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.
20. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).

NOTE: Keep the bracket cover on when inserting this into post, this will cover the screw attachment area.
ATTACHING CROSSOVER SWIVEL BRACKETS TO POSTS/CONTINUED
TREX® SIGNATURE™

6. Determine location/height of the stair crossover swivel bracket by aligning the angle of this with the fixed brackets (or compound swivel brackets) already installed (posts can be cut if necessary).

7. Once location/height is determined, center and pre-drill two holes (using a drill bit slightly smaller than that of self-tapping screw diameter) on opposite sides of post, approx. 1/4" (0.6 cm) from top of post. Drill through the post and into the stair crossover swivel bracket on each side.

8. Attach stair crossover swivel bracket to post with two self-tapping screws (provided). Slide cover over post to hide screws.

ATTACHING RAILS IN CROSSOVER POST APPLICATIONS
TREX® SIGNATURE™

Cutting Top Stair Rail and Insert For Stair Post-to-Stair Crossover Post Configuration

When Using Fixed Stair Brackets:

9a. Top stair rail along with rail insert must be cut differently on each side of the rail. Railing side that attaches to standard post should be cut 1/4" (0.6 cm) shorter than the mark to allow for fit into top rail bracket. Railing side that attaches to the crossover post should be cut directly on the mark to allow for fit into the crossover post bracket.

When using Upper Stair Swivel and Stair Crossover Swivel Brackets:

9b. When going from standard stair post to stair crossover post, measurement must be taken from inside of top horizontal stair swivel bracket to inside lip of stair crossover bracket. Crossover post will need to be modified to have swivel crossover bracket installed.
ATTACHING RAILS IN CROSSED POST APPLICATIONS CONTINUED

10. Cut each end of the top stair rail along with rail insert on the mark line to allow for fit into the crossover post bracket on each side.

Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover

11. Mark and cut top rail cover same length as top rail for all top rail configurations.

12. Attach “crowned” upper stair rail cover to upper stair rail by aligning cover on one side of rail. Then, starting from one end of stair rail, snap cover onto opposing slot working down length of stair rail. GENTLY tapping with a rubber mallet may facilitate fastening.

Installing Balusters into Bottom Stair Rail

13. Place balusters into holes in lower stair rail by snapping fully into place. In some cases, GENTLE tapping with a rubber mallet may facilitate fastening.

Attaching Upper Stair Rails

14. Working from one end of upper stair rail, snap balusters into upper stair rail working down length of rail.

15a. For stair post-to-post configuration, attach top stair rail to top stair bracket (all types) using two self-tapping screws (provided) on each side of stair bracket.

15b. For stair crossover post configuration, fasten upper stair rail to swivel crossover post bracket by installing screws diagonally through crossover stair bracket into upper rail using two self-tapping screws (provided) on each side.

NOTE: Pre-drilling is required (7/64” [0.28 cm] drill bit) for attachment of stair railing to stair bracket.
ATTACHING RAILS IN CROSSEOVER POST APPLICATIONS/CONTINUED
TREX® SIGNATURE™

Attachment of Stair Bracket Covers, Skirts, and Caps

16. Attach crossover bracket covers over opening in upper rails.
17. Attach provided post skirt to bottom of posts when using Trex® Signature™ posts.

18. Attach post caps to Trex® Signature™ posts (use of rubber mallet may be required for secure attachment).
19. Attach post caps to post sleeves using external grade PVC construction adhesive.

HOW TO INSTALL COCKTAIL STAIR RAILING
TREX® SIGNATURE™

IMPORTANT NOTES:
» Only for use with pressure-treated 4 x 4 post (3.5" nominal square) and 4" x 4" (102 mm x 102 mm) post sleeve. Trex® Signature™ posts, Trex post mounts or joist mount posts cannot be used with Trex® Signature™ Cocktail stair railing. Cutting post and post sleeve only apply to the Cocktail style railing.
» DO NOT CUT POST/POST SLEEVES UNTIL TOP RAILING AND COVER IS FULLY INSTALLED.
» When referring to previous instructions referenced, disregard all crossover post instructions as these cannot be used with Cocktail railing.

» THE DECK BOARD USED IN TREX® SIGNATURE™ COCKTAIL RAILING WILL NEED TO TERMINATE AT THE TOP OF THE POST AS SHOWN ABOVE. THE DECK BOARD WILL HAVE TO BE TOENAILED INTO THE SIDE OF THE POST IN THESE AREAS USING 2 APPROPRIATE COMPOSITE DECKING SCREWS – PRE-DRILLING IS RECOMMENDED.

Installing Pressure-treated Posts, Post Sleeves, and Skirts to Use with Trex® Signature™ Railing
1. See instructions on page 2.

Installing Brackets
2. Follow previous stair instructions for the installation of desired brackets, making sure that all dimensions are calculated before installation, and ensuring deck board is placed in correct location.
   See instructions on pages 3 and 4 for fixed stair brackets and 7-10 for swivel stair brackets.

Cutting Bottom Stair Rail, Bottom Stair Rail Cover, and Attachment of Bottom Stair Rail Cover
3. See instructions on page 3 for fixed stair brackets and pages 7-9 for swivel stair brackets.

How to Measure Top Stair Railings (WHEN REQUIRED)
4. See instructions on page 4 for fixed stair brackets and page 8 for swivel stair brackets.
**Cutting Top Stair Rail and Rail Insert When using Fixed Stair Brackets**

5a. Cut each end of top stair rail along with rail insert 1/4” (0.6 cm) shorter than mark to allow for fit into top stair rail bracket.

**NOTE:** THE TOP RAIL WILL NEED TO BE CUT AT APPROPRIATE ANGLE ON THE END OF THE RAIL THAT CONNECTS TO THE UPPER FIXED BRACKET, SO THAT WHEN THE RAIL IS INSTALLED IT SITS FLUSH WITH THE END OF THE BRACKET AS SHOWN.

**Cutting Top Stair Rail and Rail Insert When using Upper Stair Swivel and Compound Swivel Brackets**

5b. See instructions on page 9.

**Cutting Top Stair Rail Cover, and Attachment of Top Stair Rail Cover**

**Installing Balusters into Bottom Stair Rail**

7. See instructions on page 9.

**Attaching Upper Stair Rails**

8. See instructions on page 9.

**Cutting Post and Post Sleeve and Attaching Deck Board to Top Rail**

9. Cut post and post sleeves at proper angle so these are flush with the top of the top brackets and/or top rail cover. BE CAREFUL NOT to CUT brackets.

10. Place deck boards *(DO NOT use Escapes or Contour deck boards for top rail)* over top rails. PLACE DECK BOARD ON TOP RAIL TO CHECK FOR PROPER FIT AND RAIL CLEARANCE AT BRACKET LOCATIONS. DECK BOARD MAY REQUIRE EITHER A NOTCH CUT ON THE UNDERSIDE OR SLIGHT PLANING ON THE UNDERSIDE TO ALLOW DECK BOARD TO CLEAR TOPS OF BRACKETS AND SIT FLUSH ON TOP OF POSTS AND RAILS. Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end).

11. Secure boards to top rail using Trex® Signature™ Cocktail Bracket (sold separately). Ensure that there is a bracket at each end of the stair railing section, then space brackets approximately every 24” and attach with 4 screws provided.

**NOTE:** Pre-drilling before attachment is recommended.
12. Use scarf cut for posts where two deck boards meet.

**NOTES:**
- Leave 1/8” (3 mm) gap between deck boards.
- Deck boards can overhang end of last post maximum 1/2” (13 mm).

13. Where deck board terminates at top of post horizontal deck board, PREDRILL and toenail two approved composite deck screws as shown into post, being careful to avoid hitting stair bracket.

**Attachment of Bracket Covers and Skirts**

**NOTE:** Top Bracket Covers are not attached in this configuration.

Installation Instructions

HOW TO INSTALL TRADITIONAL STAIR RAILING/CONTINUED
TREX® SIGNATURE™

Installing Upper Fixed Stair Brackets and Measuring Upper Rail
7a. See instructions on pages 4.

Installing Upper Swivel and Swivel Compound Stair Brackets and Measuring Upper Rail
7b. See instructions on pages 8-9.

Cutting Top Stair Rail and Rail Insert When Using Fixed Stair Brackets
8a. See instructions on page 5.

Cutting Top Stair Rail and Rail Insert When Using Swivel Compound Stair Brackets and Measuring Upper Rail
8b. See instructions on page 9.

Attaching Upper Stair Rails When Using Fixed Stair Brackets
9a. See instructions on page 6.

Attaching Upper Stair Rails When Using Swivel Compound Stair Brackets
9b. See instructions on page 9.

Attaching 2” x 4” to Top Rail

10. Place 2” x 4” (51 mm x 102 mm) beside top rail. Mark and cut (both ends need to be cut on an angle for proper fit).

11. Place 2" x 4" (51 mm x 102 mm) on Trex® Signature™ top stair rail.

12. Secure 2" x 4" (51 mm x 102 mm) to top rail using Trex® Signature™ Cocktail Bracket (sold separately(748,757),(897,967)). Ensure that there is a bracket at each end of the railing section, then space brackets approximately every 24” and attach with 4 screws provided.

NOTE: Pre-drilling before attachment is recommended.

13. Pre-drill a pilot hole and toenail 2-1/2” (6.4 cm) screw at each end of 2” x 4” (5.1 cm x 10.2 cm) into post on back side of rail (side not facing decking).

Attachment of Lower Stair Bracket Covers, Skirts, and Caps Fixed Bracket
14a. See instructions on page 6.

Attachment of Lower Stair Bracket Covers, Skirts, and Caps Swivel or Compound Swivel Bracket
14b. See instructions on page 10.

NOTE: Top Bracket Covers are not attached in this configuration.
