NOTES:

» TREX TRANSCEND RAILINGS ARE DESIGNED TO BE INSTALLED OVER THE DECKING FRAME OR ON INSIDE OF RIM JOIST. NOTCHING OF PRESSURE-TREATED POSTS OR POSTS INSTALLED ON OUTSIDE OF RIM JOIST IS NOT ALLOWED.

» All Trex Transcend railing lengths are manufactured at ON CENTER dimensions (spanning from center of each post): 67-5/8” (1718 mm) for 6’ (1.83 m) on center, and 91-5/8” (2353 mm) for 8’ (2.44 m) on center. Note that railings are designed to be slightly longer that required to allow for very slight play in post placement – some minimal trimming may be required. IT IS VERY IMPORTANT TO MEASURE FIRST.

PARTS

A. Crown or Universal
B. Universal
C. Trex Railing Support Bracket (RSB)
D. TrexExpress™ Railing Assembly Template*
E. Rail gaskets
F. Balusters
G. Post sleeve cap*
H. Post sleeve skirt*
I. Post sleeve – 4” x 4” (102 mm x 102 mm) or 6” x 6” (152 mm x 152 mm) post sleeve)**
J. Trex decking
K. Trex fascia
L. Code-approved wood joist – 2” x 8” (51 mm x 203 mm)
M. Code-approved wood rim joist – 2” x 8” (51 mm x 203 mm) or larger
N. Adjustable foot block (quantity of one is required for all railing span lengths)
O. Baluster spacer

Trex Transcend Glass Panel Parts List
P. Panel support molding
Q. Tempered glass panel*
R. Trex panel support molding spacer
S. Weather-stripping

* Item not included in the Transcend railing kits.
** Both 4” x 4” (102 mm x 102 mm) and 6” x 6” (152 mm x 152 mm) post sleeves are designed to fit over 4x4 pressure-treated post.

NOTE: Pictorial representations shown may only show one style of railing, while others may also be used. Review detailed instructions to determine what railing styles and combinations can be used.

NOTE: Basic installation for balusters is the same for all options. When using round or square aluminum balusters, use correct baluster spacers.

NOTE: If installing 42” (1067 mm) railing, use longer post sleeves and measure accordingly to ensure a proper cut. DO NOT CUT TO ACTUAL 42” LENGTH WITHOUT CONFIRMING WHAT STYLE OF RAILING YOU ARE INSTALLING.

NOTE: If using post mounts, refer to detailed instructions provided with post mounts for attaching these prior to installation of any railing type.

Screws Supplied with RSB
C1. Wood screw for attachment of RSB to wood post/composite sleeve
C2. Self-tapping rail screw for attachment of railing to RSB
TREX TRANSCEND® RAILING
Installation Instructions

TREX TRANSCEND® RAILING CONFIGURATIONS

Note: See specific installation instructions for attachment of Trex Post Mounts or Trex Joist Mount Posts prior to installing any railing.

Cutting post sleeves is **NOT** required.
A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve*, or Joist Mount Post/Trex post sleeve* (INSIDE MOUNT ONLY)
B. Crown rail
C. Universal bottom
D. Trex balusters
See page 3 for “How to Install Standard Railing”.

Post sleeves **WILL NEED TO BE CUT.**
A. Pressure-treated post with Trex Transcend post sleeve
   **NOTE:** Only for use with 4" x 4" (102 mm x 102 mm) post sleeve.
   » Trex post mounts cannot be used with Transcend cocktail design.
B. Deck board top rail (1 x 6 or 2 x 6). **NOTE:** Contour and Escapes cannot be used.
C. Universal top rail
D. Universal bottom
E. Trex balusters
See page 5 for “How to Install Cocktail Railing”.
**NOTE:** Additional pan head screws will need to be purchased - see detailed instructions.

Cutting post sleeves is **NOT** required.
A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve*, or Joist mount post/Trex post sleeve* (INSIDE MOUNT ONLY)
B. 2” x 4” (51 mm x 102 mm) lateral top rail
C. Universal top rail
D. Universal bottom
E. Trex balusters
See page 6 for “How to Install Traditional Railing”.
**NOTE:** Additional pan head screws will need to be purchased - see detailed instructions.

» Follow desired railing style instructions found above, substituting correct baluster spacer for type of baluster being used.
» Refer to detailed instructions for added steps when using round and square aluminum balusters. See page 7.

Cutting post sleeves is **NOT** required.
A. Pressure-treated post/Trex post sleeve, Trex post mount/Trex post sleeve**, or Joist mount post/Trex post sleeve** (INSIDE MOUNT ONLY)
B. Crown rail (use universal rail if building cocktail or traditional design with glass inserts)
C. Universal bottom
D. Tempered glass panel (**NOT** included in kit)
See page 8 for “How to Install Standard Glass Panel Railing”, page 10 for “How to Install Cocktail Style Glass Panel Railing” (**NOTE:** Trex Post Mounts or Trex Joist Mount Posts cannot be used with this railing configuration), and page 11 for “How to Install Traditional Style Glass Panel Railing”.
**NOTE:** Glass panels are **NOT** recommended in stair applications.

**NOTE:** Construction methods are always improving. Please ensure you have the most up-to-date installation instructions by visiting: trex.com

Have Questions?
1-800-BUY-TREX

TRR-1218
HOW TO INSTALL STANDARD RAILING
TREX TRANSCEND

Read all instructions BEFORE installation.

Important: Post sleeves are NOT to be cut for this design style.

Installing Pressure-Treated Posts

» Posts are to be installed 6’ (1.83 m) or 8’ (2.44 m) on center to accommodate appropriate railing length.
» Attach posts using 1/2” (130 mm) carriage bolts.
» Minimum joist size is 2” x 8” (51 mm x 203 mm).
» Top bolts must be 1” (25 mm) from tops of joists.
» Bottom bolts must be 5-1/8” (130 mm) from top bolts.
» Bolts can be countersunk flush with framing to allow for fascia attachment.

NOTE: Blocking can be added for extra strength.

Installing Railing Support Brackets (RSBs)

Option 1: Without TrexExpress railing template

3a. Mark 5-1/2” (140 mm) and 35-1/16” (891 mm) from deck surface OR for 42” (1067 mm) height, mark 5-1/2” (140 mm) and 41-1/16” (1043 mm) from the deck surface.
3b. Place RSBs directly under marks, center on posts, and secure with 2” (51 mm) wood screws (provided with post sleeve). Place top RSBs flat side up, bottom RSBs flat side down.

Option 2: With TrexExpress railing template

3c. Place RSBs in template. Place top RSBs flat side UP , bottom RSBs flat side DOWN . Secure template on post with tape or rubber band, with bottom of template resting on post skirt.
3d. Secure RSBs with 2-1/2” (64 mm) wood screws (provided in railing kit) and remove template.

NOTES: Special steps are necessary when using 6” x 6” (152 mm x 152 mm) plastic TrexExpress template.
» Cut off 1/2” (13 mm) from the bottom (blue arrows up) of the tool BEFORE first use.
» Position top RSBs ONLY, 6” (152 mm) higher for 42” (1067 mm) rail height.
» Secure RSBs with 2-1/2” (64 mm) wood screws (provided with post sleeve) and remove template.

NOTE: Construction methods are always improving. Please ensure you have the most up-to-date installation instructions by visiting: trex.com
Cutting Railings and Baluster Spacers

4. Measure between posts and cut rails to length.
5. Cut baluster spacers the same length as rails. Make sure the baluster spacer holes are equally spaced to ensure balusters will line up.

NOTES:
» If using optional rail gaskets, subtract 1/16" (1.6 mm) from each end.
» Attach baluster spacers to railing before cutting to allow for cleaner cut and less work.
» When measuring, cut equal lengths from each side of railing and baluster spacer to ensure equal spacing of balusters per each railing section.
» In some cases, the gasket can be attached before tightening railing to RSB.
» If gaskets are tight, use a small flat head screwdriver to compress the tabs of the gasket if they are stuck outside the rail.

IMPORTANT NOTE REGARDING FOOT BLOCK INSTALLATION:
» One foot block is REQUIRED for all railing spans.
» Refer to detailed instructions (Trex Transcend® rail instructions) included with foot block prior to installation of railing section as these include other required steps for proper installation.

Attaching Bottom Rail (Universal Rail)
7. Lift bottom rail so RSBs are in the channel and attach with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

Attaching Top Rail – (Crown Rail)
8. Place crown rail on RSBs. Attach top rail to RSB with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

Placing Baluster Spacers
9. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer.

Attaching Balusters
10. Place baluster into both baluster spacers, ensuring that balusters are fully seated into the channel. Working at a slight angle, maneuver balusters into top rail. See page 7 if using aluminum round or square balusters for additional information.
HOW TO INSTALL STANDARD RAILING/CONTINUED
TREX TRANSCEND

11. Slide baluster spacer up and snap into top rail. Place optional top rail gaskets on each end of rail.

Attaching Post Caps and Installing Foot Blocks
12. Secure post caps with silicone or PVC adhesive. Attach foot block per foot block instructions.

NOTE: Clean up any excess adhesive before it dries.

HOW TO INSTALL COCKTAIL RAILING
TREX TRANSCEND

Important: ONLY use with 4” x 4” (102 mm x 102 mm) post and post sleeve. Cutting post and post sleeve ONLY applies to the Cocktail style railing.

1. Installing Pressure-Treated Posts
   See instructions on page 3.

Cutting Post and Post Sleeve
2. Mark and cut post and post sleeve measuring from deck surface:
   » 36-3/16” (919 mm) for 36” (914 mm) height.
   » 42-3/16” (1072 mm) for 42” (1067 mm) height.

3. Installing Post Sleeve Skirts and Post Sleeves
   See instructions on page 3.

4. Installing Railing Support Brackets (RSBs)
   See instructions on page 3.

5. Cutting Railings and Baluster Spacers
   See instructions on page 4.

6. Attaching Foot Block to Bottom Rail
   See instructions on page 4.

7. Attaching Bottom Rail (Universal Rail)
   See instructions on page 4.

Attaching Inverted Universal Rail as Top Rail
8. Place inverted universal rail onto RSBs with balusters in channel. Attach universal rail to RSBs with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

9. Place deck boards over universal rails (DO NOT use Escapes deck boards for top rail). Attach boards on each post with Trex-recommended composite screws (quantity of 2 per each board end). Secure boards to universal rails from underside of railing into bottom of decking board, with 2” (51 mm) pan-head screws (not provided) at an angle every 16” (406 mm) on center.
HOW TO INSTALL COCKTAIL RAILING/CONTINUED
TREX TRANSCEND

IMPORTANT NOTES:
» If using Select decking, **USE** maximum length 1-3/4” (44 mm) screw and **NOT** 2” (51 mm) screw.
» Screws that are used for attachment of decking board to railing **MUST** be attached at angle to prevent screw from penetrating through the top of decking board.

10. Placing Baluster Spacers
   See instructions on page 4.

11. Attaching Balusters
    See instructions on page 4 for standard balusters or page 7 for aluminum balusters.

12. Slide baluster spacers up and snap into universal rails.

13. Use scarf cut for posts where two deck boards meet.

14. **Installing Foot Block**
    Attach foot block per detailed instructions.

NOTES:
» Leave 1/8” (3 mm) gap between deck boards.
» Deck boards can overhang end of last post a maximum 1/2” (13 mm).

HOW TO INSTALL TRADITIONAL RAILING
TREX TRANSCEND

1. **Installing Pressure-Treated Posts**
   See instructions on page 3.

2. **Installing Post Sleeve Skirts and Post Sleeves**
   See instructions on page 3.

3. **Installing Railing Support Brackets (RSBs)**
   See instructions on page 3.

4. **Cutting Railings and Baluster Spacers**
   See instructions on page 4.

5. **Attaching Foot Block to Bottom Rail**
   See instructions on page 4.

6. **Attaching Bottom Rail (Universal Rail)**
   See instructions on page 4.

**Attaching Inverted Universal Rail as Top Rail**
7. Place inverted universal rail onto RSBs with balusters in channel. Attach universal rail with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).
HOW TO INSTALL TRADITIONAL RAILING/CONTINUED

TREX TRANSCEND

8. Measure between posts and cut 2" x 4" (51 mm x 102 mm) to length. Place 2" x 4" (51 mm x 102 mm) on universal rail. Attach board to rail with 2" (51 mm) pan-head screws (not provided) every 16" (406 mm) on center.

9. Pre-drill a pilot hole and toenail 2-1/2" (64 mm) composite decking screw (not provided) at each end of 2" x 4" (51 mm x 102 mm) into post on back side of rail (side not facing decking).

10. Placing Baluster Spacers
    See instructions on page 4.

11. Attaching Balusters
    See instructions (page 4) for standard balusters or instructions below for aluminum balusters.

12. Slide baluster spacer up and snap into universal rail.

    NOTE: If necessary, cut tips off rail gaskets prior to installation.

13. Attaching Post Caps and Installing Foot Block
    Attach foot block per detailed instructions.

HOW TO INSTALL ROUND OR SQUARE ALUMINUM BALUSTERS

TREX TRANSCEND

1. Installing Pressure-Treated Posts
    See instructions on page 3.

2. Installing Post Sleeve Skirts and Post Sleeves
    See instructions on page 3.

3. Installing Railing Support Brackets (RSBs)
    See instructions on page 3.

4. Cutting Railings and Baluster Spacers
    See instructions on page 4.

5. Attaching Foot Block to Bottom Rail
    See instructions on page 4.

6. Attaching Bottom Rail (Universal Rail)
    See instructions on page 4.

7. After bottom rail is fully installed, place aluminum baluster adaptor strip into channel of bottom rail, ensuring that it’s fully seated into the channel. When rail lengths are non-standard, the baluster adaptor strip will need to be cut 2-1/2" (64 mm) shorter than the rail to allow clearance for the RSBs on each end.
HOW TO INSTALL ROUND OR SQUARE ALUMINUM BALUSTERS/CONTINUED

TREX TRANSCEND® RAILING

8. Attaching Top Rail
   See specific instructions based on top rail of choice.

9. Installing Upper Aluminum Baluster Adaptor Strip, and Baluster Spacers
   After top rail is fully installed, place aluminum baluster adaptor strip into channel of top rail, ensuring that it's fully seated into the channel.

10. Snap baluster spacer into bottom rail. Place inverted baluster spacer on top of first baluster spacer.

11. Attaching Balusters
   Working at a slight angle, press baluster through both baluster spacers and into bottom aluminum baluster adaptor strip, ensuring balusters are tight. Once balusters are seated into aluminum baluster adaptor strip of bottom rail, maneuver baluster into upper rail aluminum baluster adaptor strip. Some force will be needed to press balusters into place and level them.

   Tip: Ensure balusters are level prior to attempting to slide baluster spacer up. This will allow for the baluster spacer to move up freely and snap into upper rail. Use of a rubber mallet to gently tap balusters in level is recommended.

12. Slide baluster spacer up and snap into top rail. Place optional top rail gaskets on each end of rail.

HOW TO INSTALL STANDARD GLASS PANEL RAILING

TREX TRANSCEND

Notes: Read all instructions BEFORE installation.

» You must purchase the 1/4” (6 mm) tempered glass panels. See dimensions below.
» Glass panels ONLY for use with maximum 6’ (1.83 m) on center post spacing.
» NOT recommended for stair applications.
HOW TO INSTALL STANDARD GLASS PANEL RAILING/CONTINUED
TREX TRANSCEND

1. Installing Pressure-Treated Posts  
   See instructions on page 3.

2. Installing Post Sleeve Skirts and Post Sleeves  
   See instructions on page 3.

3. Installing Railing Support Brackets (RSBs)  
   See instructions on page 3.

4. Cutting Railings and Baluster Spacers  
   See instructions on page 4.

5. Attaching Foot Block to Bottom Rail  
   See instructions on page 4.

6. Attaching Bottom Rail (Universal Rail)  
   See instructions on page 4.

Attaching Weather-stripping and Positioning Panel

7. Push black-edged trim onto upper and lower edges of panel. Be sure trim runs entire length of glass. Extra trim can be cut with razor blade or scissors.

8. Position panel with weather-stripping into lower rail channel. Center panel between posts with about 2" (51 mm) of air space on each side of panel.

Attaching Top (Crown) Rail

9. Place top rail over RSB brackets and glass panel. Attach top rail to RSB with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

NOTE: Avoid hitting glass panel while using the drill.

Attaching Panel Support Molding (PSM)

Hiding Brackets

11. Cut Transcend baluster spacer into four lengths equal to distance between the glass panel and posts. Cut slowly and one at a time to avoid chipping.

12. Snap spacer into bottom and top rail to hide brackets and create a seamless look.

13. Attaching Post Caps and Installing Foot Blocks  
   See instructions on page 5 and detailed foot block instructions.

TEMPERED GLASS PANEL DIMENSIONS

» 36" (914 mm) high rail:  
   1/4" x 30" x 63-1/2" max.  
   (6 mm x 762 mm x 1613 mm)

» 42" (1067 mm) high rail:  
   1/4" x 36" x 63-1/2" max.  
   (6 mm x 914 mm x 1613 mm)

Have Questions?

NOTE: Construction methods are always improving. Please ensure you have the most up-to-date installation instructions by visiting: trex.com

TRR-1218
HOW TO INSTALL COCKTAIL STYLE GLASS PANEL RAILING
TREX TRANSCEND

NOTES: Read all instructions BEFORE installation.
» You must purchase the 1/4” (6 mm) tempered glass panels. See dimensions at below.
» Glass panels ONLY for use with maximum 6’ (1.83 m) on center post spacing.
» Not recommended for stair applications.
» Trex post mounts cannot be used for this application.

1. Installing Pressure-Treated Posts
See instructions on page 3.

NOTE: If installing glass with cocktail rail design, rail posts and post sleeves must be cut.

2. Cutting Post and Post Sleeve
See instructions on page 3.

3. Installing Post Sleeve Skirts and Post Sleeves
See instructions on page 3.

4. Installing Railing Support Brackets (RSBs)
See instructions on page 3.

5. Cutting Railings and Baluster Spacers
See instructions on page 4.

6. Attaching Foot Block to Bottom Rail
See instructions on page 4.

7. Attaching Bottom Rail (Universal Rail)
See instructions on page 4.

8-9. Attaching Weatherstripping and Positioning Panel
See instructions on page 9.

Attaching Top Rail

10. Cut deck boards to appropriate length of railing span, remembering to include extra space on each side of the deck board to allow for attachment to the post. Decking boards must cover 1/2 of the pressure-treated post to allow this to be fastened later. If you include extra decking material on each side, this can be cut off later if necessary.

11. Place inverted deck board (place top side of deck board down) on clean, flat surface.
(Do NOT use Escapes deck boards for top rail.)

12. Place universal rail on the deck board. Orient this properly so when flipped over, the universal rail will accept the baluster spacer and balusters. Center in both directions to allow final attachment to post.

TEMPERED GLASS PANEL DIMENSIONS
» 36” (914 mm) high rail:
  1/4” x 30” x 63-1/2” max.
  (6 mm x 762 mm x 1613 mm)

» 42” (1067 mm) high rail:
  1/4” x 36” x 63-1/2” max.
  (6 mm x 914 mm x 1613 mm)
HOW TO ATTACH COCKTAIL STYLE GLASS PANEL RAILING/CONTINUED

13. Secure deck board to universal rail with 2" (51 mm) pan head screws (not provided), approximately every 16" (406 mm) on center at an angle. (DO NOT overtighten. Attach from underside of railing into bottom of decking board.)

Important notes:
» If using Select decking, USE maximum length 1-3/4" (45 mm) screw and NOT 2" (51 mm) screw.
» Screws that are used for attachment of decking board to railing MUST be attached at an angle to prevent screw from penetrating through top of decking board.

14. Place inverted universal rail with deck board attached onto RSB’s with glass panel in the channel. Attach universal rail to RSB’s with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

15. Attach deck board to post (ensure that screws are attached to wood post) with Trex recommended composite screws (quantity of 2 per each board end).

16. Attaching Panel Support Moldings
See instructions on page 9.

17-18. Hiding Brackets
See instructions on page 9.

19. Installing Foot Block
Attach foot block per detailed instructions.

HOW TO ATTACH TRADITIONAL STYLE GLASS PANEL RAILING

NOTES: Read all instructions BEFORE installation.
» You must purchase the 1/4" (6 mm) tempered glass panels. See dimensions below.
» Glass panels ONLY for use with maximum 6’ (1.83 m) on center post spacing.
» NOT recommended for stair applications.

TEMPERED GLASS PANEL DIMENSIONS

» 36" (914 mm) high rail:
  1/4" x 30" x 63-1/2" max.
  (6 mm x 762 mm x 1613 mm)

» 42" (1067 mm) high rail:
  1/4" x 36" x 63-1/2" max.
  (6 mm x 914 mm x 1613 mm)
1. Installing Pressure-Treated Posts  
   See instructions on page 3.

2. Installing Post Sleeve Skirts and Post Sleeves  
   See instructions on page 3.

3. Installing Railing Support Brackets (RSBs)  
   See instructions on page 3.

4. Cutting Railings and Baluster Spacers  
   See instructions on page 4.

5. Attaching Foot Block to Bottom Rail  
   See instructions on page 4.

6. Attaching Bottom Rail (Universal Rail)  
   See instructions on page 4.

7-8. Attaching Weatherstripping and Positioning Panel  
   See instructions on page 9.

Attaching Top Rail

9. Cut 2" x 4" (51 mm x 102 mm) to same length of the inverted Universal rail.

10. Place inverted 2" x 4" (51 mm x 102 mm) on clean, flat surface (place top side down).

11. Place universal rail (remembering to orient this properly so that when flipped over, the universal rail will accept the baluster spacer and balusters), on the 2" x 4" (51 mm x 102 mm), centered.

12. Secure 2" x 4" (51 mm x 102 mm) to universal rail with 2" (51 mm) pan head screws (not provided) approximately every 16" (406 mm) on center.

13. Place inverted universal rail with 2" x 4" (51 mm x 102 mm) attached onto RSB’s with glass panel in the channel. Attach universal rail to RSB’s with three self-tapping screws provided (use three outer holes; do not use hole in RSB that is closest to post). If two hole bracket is included, attach with two self-tapping screws (provided).

14. Pre-drill a pilot hole and toenail 2-1/2" (64 mm) composite deck screw (not provided) at each end of the 2" x 4" (51 mm x 102 mm) into post on back side (side not facing decking).

15. Attaching Panel Support Moldings  
   See instructions on page 9.

16-17. Hiding Brackets  
   See instructions on page 9.

18. Attaching Post Caps and Installing Foot Block  
   See instructions on page 5 and detailed foot block instructions.
HOW TO INSTALL ON-AN-ANGLE RAILING
TREX TRANSCEND (CROWN AND UNIVERSAL RAILING)

NOTE: Trex railing brackets are designed to be installed up to a 45° angle.

- Small angles (1° - 30°). Both 4” x 4” (102 mm x 102 mm) or 6” x 6” (152 mm x 152 mm) post sleeves work well.
- Large angles (31° - 45°). Use only 6” x 6” (152 mm x 152 mm) post sleeves when installing on flat side.
- 45° angles using 4” x 4” (102 mm x 102 mm) post sleeves must use Transcend Bird’s Mouth brackets.
- Using 6” x 6” (152 mm x 152 mm) post sleeves at 45° angles. Brackets are installed off-center and use 45° Transcend gaskets.
- Railing gaskets are designed to fit at 0°, 22.5°, and 45° angles. Gaskets are labeled with appropriate angle dimension.

HOW TO INSTALL CROWN AND UNIVERSAL BIRD’S MOUTH RAILING
TREX TRANSCEND®

NOTES:
- Use with 4” x 4” (102 mm x 102 mm) post sleeve ONLY.
- Gaskets are only designed for use with Transcend crown and universal railing.

Read all instructions BEFORE installation.

PARTS

Mark Posts
1. Measure and mark 4” (102 mm) and 33-9/16” (852 mm) up from top of post skirt.
2. Position RSBs with adapter (flat side DOWN) for lower rail, mark and pre-drill screw holes with 1/8” (3 mm) drill bit on post.
3. Position RSBs with adapter (flat side UP) for top rail, mark and pre-drill screw holes with 1/8” (3 mm) drill bit on post.

NOTE: Without skirt, add 1-1/2” (38 mm) to measurements.

Attaching Adapters
Snap adapters into RSBs.

Pre-drill Bottom and Top RSBs

NOTE: Construction methods are always improving. Please ensure you have the most up-to-date installation instructions by visiting: trex.com
Measuring and Cutting Rails

4. Measure from corner-to-corner between posts. Mark 45° cuts on rails with template on assembly tool. Center of “V’s” is the distance from corner-to-corner for posts.

**NOTE:** Subtract 1/16” (1.6 mm) from each end to accommodate rail gaskets.

Attaching Top and Bottom RSBs

5. Attach RSBs with adapters to posts with wood screws (provided).

**NOTES:**
- Drill at slight inward angle to drill holes on marks.
- Lay cut lower rail into position on decking surface between the posts before attaching the lower RSB. There may be some difficulty attaching the lower rail if you fail to do this.

Installing Railings to RSB’s

6. Attach with self-tapping screws (provided).

Using Miter Box Saw to Cut Rails

1. Place 2” x 4” (51 mm x 102 mm) on edge behind the rail to allow for complete cut.
2. Angle blade to 45°.
3. Set stop on saw so blade travels half the depth of rails. Several test cuts can be made on scrap material to accurately set the stop.
4. “V” cut both sides of the rail.

**NOTE:** Transcend’s crown and universal rails will require different stop settings.
HOW TO INSTALL CROWN AND UNIVERSAL STAIR RAILING
TREX TRANSCEND®

Read all instructions BEFORE installation.

NOTE: All Transcend railings and gaskets ONLY work with stair slopes of 32°-37°.

Installing Posts, Post Sleeve Skirts, and Post Sleeves for Stair Rails
1. Install posts, post sleeve skirts, and post sleeves according to standard Transcend railing instructions. See page 3.

» In most cases, a post and post sleeve longer than 39” (991 mm) will be needed on the lower section of stair rail to accommodate stair angle.
» Make sure top and bottom posts for stairs are installed at nose of each tread.

Measuring and Cutting Bottom Stair Rail
2. Place a 1” (254 mm) deckboard on the nose of the stair tread.

3. Snap baluster spacer into lower stair rail and lay lower stair rail on top of the deckboard.

4. Use the lower and upper stair post to set the length of the lower stair rail. Ensure that baluster spacer holes are spaced evenly between posts. Also allow for a minimum of 1-1/2” (292 mm) at each end of the stair rail for bracket placement and baluster clearance. Mark rail at post intersections.

5. Remove lower rail, keeping baluster spacer in rail, and cut along marks.

NOTES:
» If using railing gaskets, subtract 1/16” from each end and cut.
» KEEP BALUSTER SPACER IN RAILING WHEN CUTTING. CUT VERY CAREFULLY TO NOT BREAK BALUSTER SPACER.

Attaching RSBs for Bottom Stair Rail
6. Remove baluster spacer from bottom rail and place rail in between posts, keeping rail on deckboard.
7. Mark both posts on inside channel of the bottom stair rail. Remove bottom stair rail.

8. For **UPPER** post – install **RSB FLAT SIDE DOWN, ABOVE MARKED LINE**, using two wood screws provided. Take second RSB, turn upside down and interlock into bracket.

9. For **LOWER** post – install **RSB FLAT SIDE UP, ABOVE MARKED LINE**, using two wood screws provided. Take second RSB, turn upside down and interlock into bracket.

Attaching Bottom (Universal) Stair Rail

11. Lift bottom stair rail so RSB’s are in the channel and attach with 3 self-tapping screws provided. Use the three outer holes in RSB to attach screws.

**Tip:** Deckboard can be placed underneath bottom stair rail to help hold rail firmly in place while attaching.

Cutting Balusters on Angle

12. Balusters will seat properly when cut on same angle as railing. Ensure that cuts are taken from both ends/tips of balusters as shown to retain overall same length of the balusters.

Measuring and Cutting Top Stair Rail

13. Snap bottom baluster spacer into bottom stair rail.

14. Place two balusters into lower stair rail at each end closest to the post.

**Attaching Foot Block to Bottom Rail**

10. See detailed instructions included with foot block.
15. Snap baluster spacer into top stair rail. Position top stair rail onto balusters, ensuring balusters are fully seated in rail (position to side of post), and **ENSURE** that balusters are spaced evenly AND parallel with post. Also allow for a minimum of 1-1/2" (292 mm) at each end of the stair rail for bracket placement and baluster clearance.

17. Remove upper rail, keeping baluster spacer in rail, and cut along marks.

**NOTES:**
- If using railing gaskets, subtract 1/16" from each end and cut.
- KEEP BALUSTER SPACER IN RAILING WHEN CUTTING. CUT VERY CAREFULLY TO NOT BREAK BALUSTER SPACER.

18. Remove baluster spacer from top stair rail and place rail in between posts on top of balusters, ENSURING that balusters remain parallel to post.

19. Mark both posts on inside channel of the top stair rail. Remove top stair rail.

20. For **UPPER** post – install RSB FLAT SIDE DOWN BELOW MARKED LINE, using two wood screws provided. Take second RSB, turn upside down and interlock into bracket.
TREX TRANSCEND® RAILING
Installation Instructions

HOW TO INSTALL CROWN AND UNIVERSAL STAIR RAILING/CONTINUED

21. For LOWER post - install RSB FLAT SIDE UP BELOW MARKED LINE, using two wood screws provided. Take second RSB, turn upside down and interlock into bracket.

[Image showing installation process]

24. Slide baluster spacer up and snap into top rail.

[Image showing installation process]

22. Place inverted top baluster spacer on bottom rail/baluster spacer, ensuring that baluster holes line up parallel. Install balusters into lower stair rail.

25. Stair railing gaskets are designed to fit at slopes of 32° to 37°. Gaskets are labeled in order to ensure correct location.

[Image showing gasket placement]

23. Place top stair rail on RSB’s in rail channel (ensuring balusters are also in channel of rail). Attach with 3 self-tapping screws provided. Use the three outer holes in RSB to attach screws.

[Image showing rail placement]

26. Secure post caps with silicone or PVC adhesive. Attach foot block per foot block instructions.

NOTE: Clean-up any excess adhesive before it dries.

[Image showing post cap and foot block installation]

NOTE: If a railing configuration other than Crown railing is installed (as shown above), refer to other Railing Configurations in horizontal sections for additional requirements.
